

Cold Harbour Bridge Refurbishment Works 2017

MKC Structure No. 84361

2nd August 2017
Update No.2

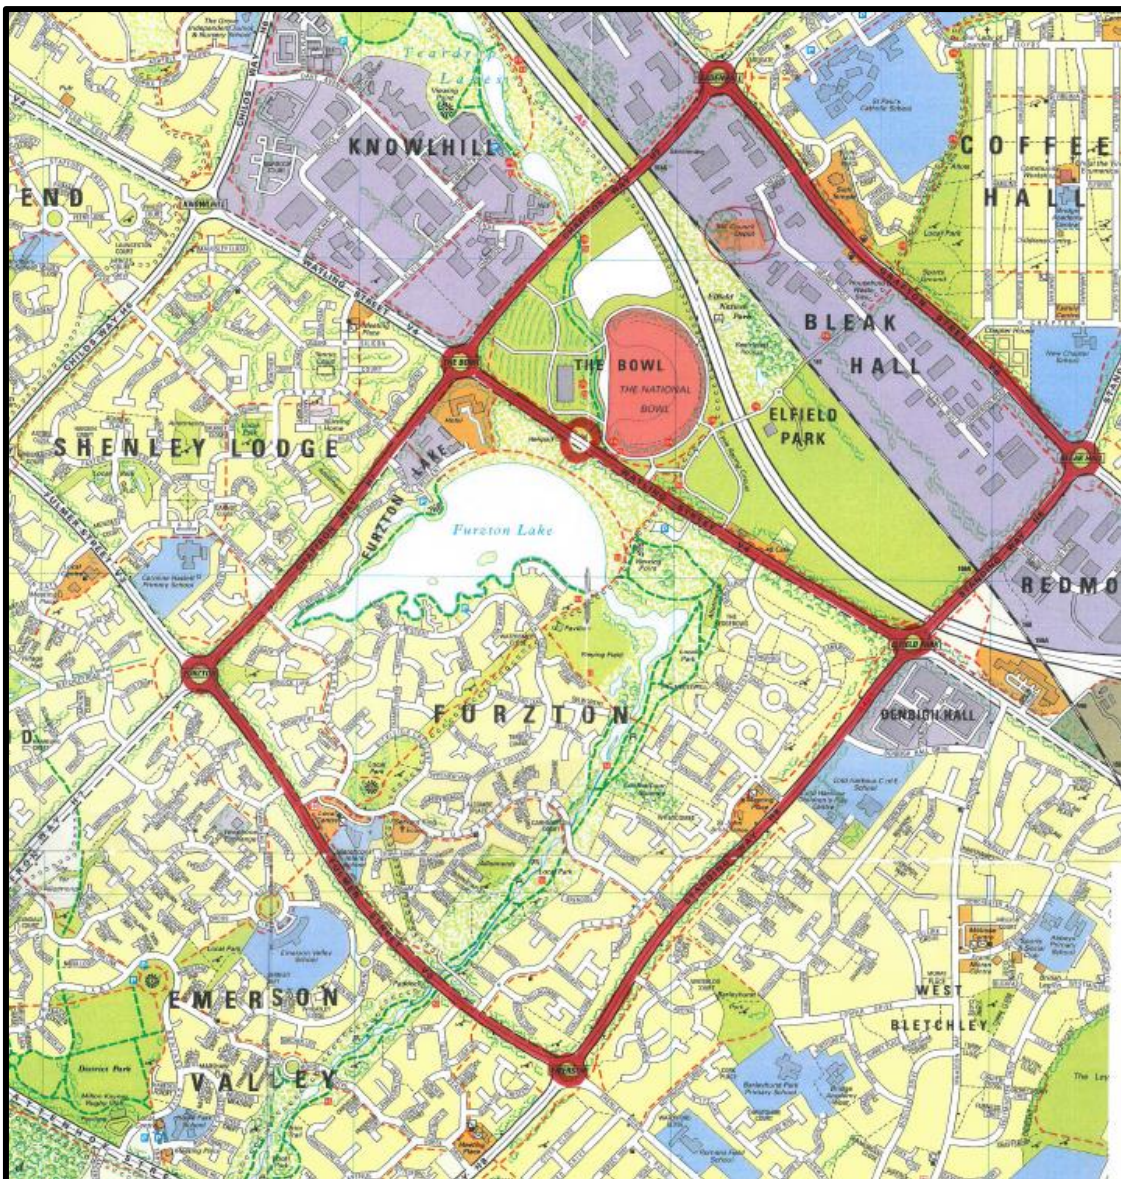

Traffic Management

In the operation and maintenance of highway networks it is necessary to put in place traffic management measures to facilitate safe road works and incident management.

To enable the works to be carried out safely, the road will be closed for the duration of the site works, which will inevitably lead to congestion during peak times. Diversion routes are provided to minimise disruption to the public (See below for the diversion routes).

Significant traffic delays are expected during the work and the public are advised to find alternative routes.

The work will start on the 21st August 2017 and it is anticipated that the work will take 6 to 8 weeks to complete.

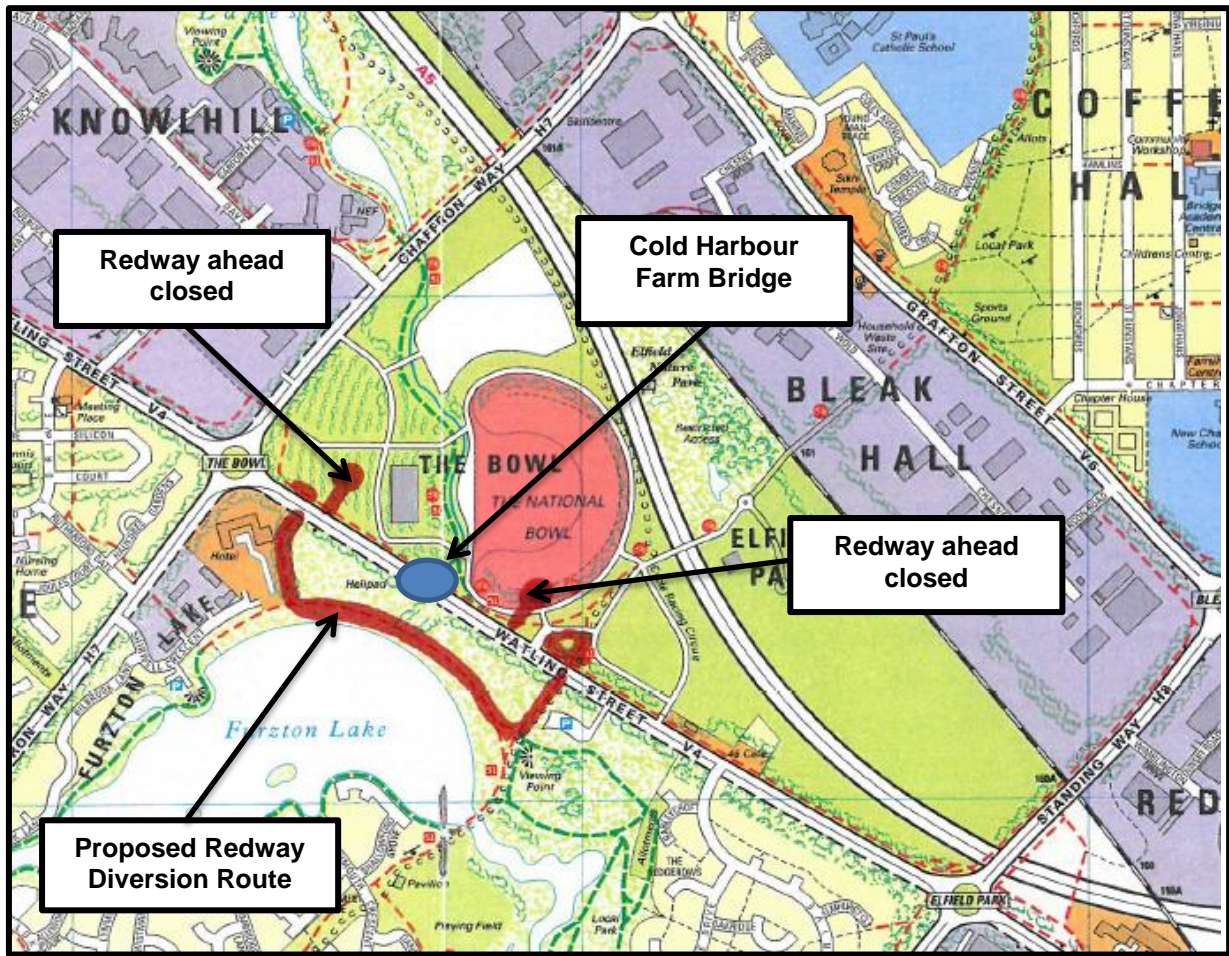

Diversion Routes

- South diversion: Watling Street V4, Chaffron Way H7, Fulmer Street V3, Standing Way H6, Watling Street V4 & vice versa
- North diversion: Watling Street V4, Chaffron Way H7, Grafton Street V6, Standing Way H6, Watling Street V4 & vice versa)
