

# Street Lighting

2017-2018 LED Conversion  
Programme

## What's happening...

The street lights in your area are being upgraded to LED lanterns.

This involves replacing the light head and if required, replacing any damaged or deteriorated poles completely.

All the work will be carried out by our highway service provider, Ringway and will take between six and nine months to complete.

Conservation areas are also included but will receive lights and poles in keeping with the unique character of the area.

## Why upgrade to LED?

An LED lantern will run for up to 20 years without requiring a lamp change reducing maintenance and energy costs.

LEDs provide better quality of lighting and can be positioned exactly where extra light is needed. They also create less light pollution and sky glow than older lights.

LEDs can be dimmed by 30% between 10pm and 6am saving on energy usage but without losing quality of light on the roads and footpaths.

Milton Keynes Council will be undertaking the replacement of street lights in your local area.

This leaflet provides information about why, how and when we are doing this upgrade. Disruption will be kept to a minimum whilst works are ongoing.

You can find additional information on this project and other projects on the Highways and Transport Hub at:
