

Department for Transport Incentive Fund Works 2017/18

Allocated Budget : £ 395,000

Treatment Type : Micro-Asphalt Footways

Contractor : Ringway Infrastructure Services Ltd

Sub-Contractor : JCPS Ltd

Following the award of the DfT Incentive Fund element Milton Keynes Council identified assets that would benefit from a preventative treatment approach to preserving the footways in a number of estates.

This is part of an annual programme and by re-investing grant money awarded as a result of the assessment of how the authority delivers Asset Management, the decision to spend on supporting our Asset Management Strategy is the most appropriate use of these funds.

We carry out a life cycle costing on footways together with information gathered from our yearly enhanced Footway Network Survey (FNS) to identify the areas that are at a stage in their lifecycle and in a current state of condition to benefit from this process.

The total area of footway treated is 90,000 square metres.

The programme of streets for each estate for 2017/18 is shown on the following page.
