

A422 BRADWELL BROOK BRIDGE EDGE STRENGTHENING (EASTBOUND)

Regular users of the A422 may be aware of a structure next to the famous concrete cows that has had the northern edge protected by temporary concrete barriers for several years pending a permanent solution. This autumn the structure will be strengthened and safety fence installed between the carriageway and footway.

A scheme has now been produced and the essential works are scheduled to start on **Sunday 30th September 2018** with a completion date by 23rd November 2018.

The works are to be undertaken by the Highway's Term Service Contractor, Ringway working with their sub-contractor F.j.Morris.

For safety reasons the existing footpath will have to be closed throughout the works. There is no obvious alternative route for pedestrians so a temporary footbridge will be constructed to the north of the road bridge to allow pedestrians safe passage. The inconvenience to pedestrians will be minimal with no additional journey times.

One lane of the A422 eastbound will have to be closed throughout the works. (With the exception of 30/9/18 only where both lanes will be closed)
The traffic will run in lane 2 and we will try to keep the closure period to a minimum.

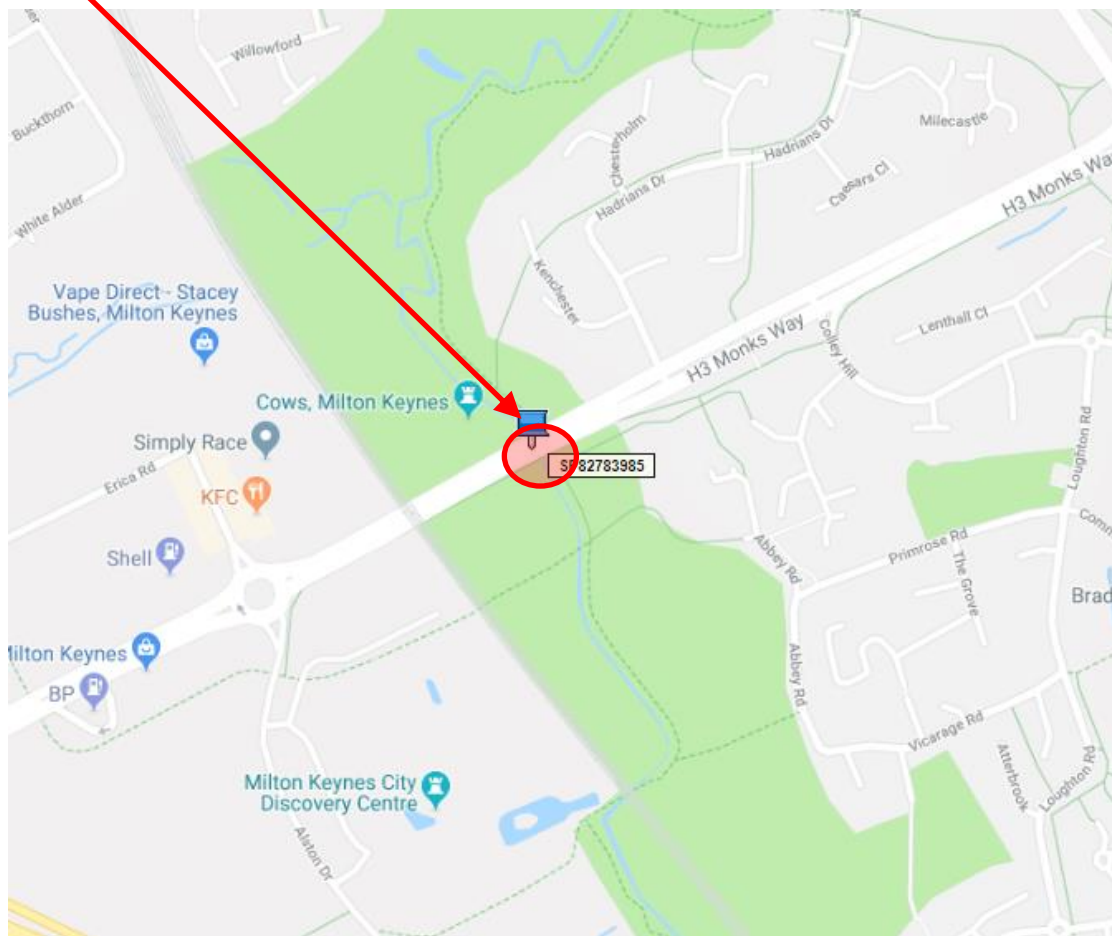

A map is provided overleaf showing the area affected.

We thank you for your patience during the above works. Should you have any questions please contact the Project Manager, James Pearce (james.pearce@milton-keynes.gov.uk)
