

WILLEN SOUTH LAKESIDE CHANNEL FOOTBRIDGE

As many of you will be aware as regular users of the Redway around the West side of Willen lake there was an unfortunate incident in Autumn 2018 which led to the collapse of the footbridge. A replacement structure was subsequently designed and commissioned.

The new structure has been installed this week and the route is now open as normal again. The installation went very smoothly and we are very pleased with the end result.

We think you'll agree that the new bridge looks fantastic and we anticipate many years of trouble free service.

The works were undertaken by the Highway's Term Service Contractor Ringway in conjunction with sub-contractor's Sarum Hardwood Structures and F.j.Morris.

For those of you less familiar with the area a map is provided overleaf showing the bridge location.

The Council wishes to thank the local community for their patience before and during the above works. Any comments on the new structure please feel free to contact the Project Manager, James Pearce. (james.pearce@milton-keynes.gov.uk)

WILLEN SOUTH LAKESIDE CHANNEL FOOTBRIDGE
