

Helps our environment

Reduces pollution of water ways, reduces emissions caused by landfill and burning rubbish.

Saves natural resources

Reduces deforestation, impact of mining, soil erosion, etc.

Creates jobs

Workers, maintenance, factory designers, engineers, reprocessors and more! New technology developed.

Why do we recycle?

Creates new products

Recycling creates new products for us to buy and recycle again and again!

It shows we care

Recycling at home and school shows that I care for the environment, for nature and for where I live.

Saves energy

Recycling saves energy and water when compared to creating brand new products.
