

Going back to school

My family and I could not leave my house because of Corona virus.

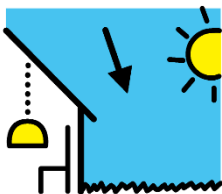

I was in my house for a long time

I did not go to school

Now the government have said me and my family can go out again because it is safe now.

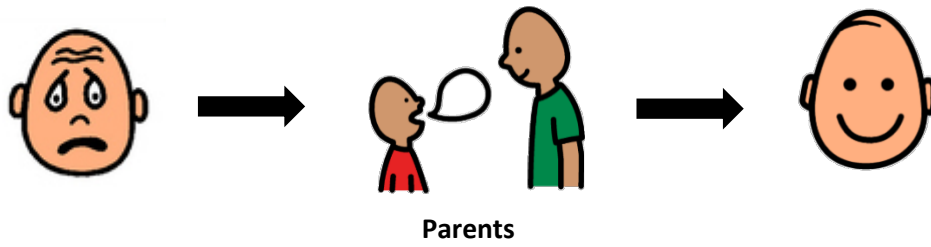

This means I can go to school.

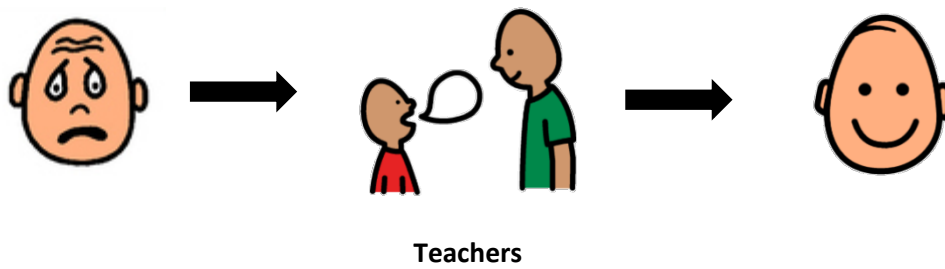

I am a little worried about going out of my house and back to school.

If I get too worried I will speak to my parents and they will help me to feel calm.

If I get too worried at school I will speak to my teachers and they will help me to feel calm

I will be happy to see my friends and teachers again.
