Place recycling loose in the pink bin

Place glass bottles and jars in the blue bin

All food waste

All broken glass

Tissues and kitchen towel

Dog waste

All nappies and wipes

Crisp packets and biscuit wrappers

Please bag rubbish before placing in the black bin

Recycling rules of thumb

Most people put at least one thing they shouldn't into their recycling. Putting the wrong things in your recycling can spoil it and even cause whole truck loads to be rejected.

Here are our recycling rules to help you recycle correctly:

1. Update your recycling knowledge. Just because it looks recyclable, doesn't mean we can recycle it here in Milton Keynes. Visit our website to check what you know.
2. If in doubt, leave it out. Being a good recycler is as much about what you leave out of your recycling as what you put in. If you're unsure about anything, put it in your black sack.
3. No food or drink at all should ever go in your recycling, not even crumbs! Even small amounts of food, dry or wet, can ruin paper for recycling.
4. Make sure items are empty, clean and dry wet and dirty items can spoil other recycling while it is being processed.
5. Nothing else goes in your recycling if you're struggling with too much waste or aren't sure how to recycle, get in touch and we can help.

We know recycling can be confusing, but there are reasons for why we can and can't accept different things.

To find out more about our recycling system, visit:
