

EHC Needs Assessment Process

How to request an EHC needs assessment

An Education, Health and Care Plan (EHCP) is a legal document that outlines the support and provision a child/young person (YP) requires to enable them to achieve their desired outcomes and aspirations. A request for an EHC needs assessment can come from a variety of sources, including parents/carers, school/setting or other professionals involved in a child's care. It is hoped that all involved in the child/YP's care would be involved in the decision to request a needs assessment, and will have input into the documents required for it.
