Foreword

Sherington is a very special village, with a distinct character that has been recognised by this and past parish councils, who have sought to define, protect and evolve the growth of the village. The open structure of the village has been well preserved with the countryside extending into the heart of the settlement. The protection of this character is paramount to ensure the village is passed on to successive generations in a recognisable form.

As a community, it has been accepted that limited housing development within the village is necessary. The Neighbourhood Plan will ensure that development is shaped by the wishes of the residents of the village.

The Sherington Neighbourhood Plan establishes a vision for Sherington that helps to deliver the community's aspirations, wants and needs from 2016 to 2031. It is the latest iteration of a long line of village plans and assessments dating back to the early 1970's, and carries forward the themes of those earlier documents, namely the protection of the open character and historic setting of the village. A limited amount of new development is needed, and this has been supported by the community, however, the Neighbourhood Plan will ensure that such development does not undermine or harm the distinctive character that makes Sherington the place it is today.

Neighbourhood planning has been introduced through the Localism Act 2011 to ensure that local communities are involved in the planning decisions which affect them.

A neighbourhood plan allows communities to have a say in defining the character of the village, identifying areas that should be protected, elements that should be improved and the types of development they want to see in their area.

The production of the Sherington Neighbourhood Plan has helped our community to:

- develop a shared vision for our village.
- identify important Local Green Space and other treasured assets for protection.
- identify improvements that can be made to Sherington's facilities, services, biodiversity and environment, including the provision of a new community hub in the centre of the village.
- choose where homes, and forms of development should be built, as well as influence how much housing should be built and of what type.

Our plan has been produced by a steering group consisting of members of the parish council and residents. The steering group have listened to individuals and local organisations on a wide range of issues that influence the preparation of the Neighbourhood Plan, which has been prepared with regular, active engagement and consultation with the local community.

Draft versions of the Neighbourhood Plan and the policies it contains have been published on the parish council website and discussed with residents and stakeholders at meetings and public exhibition events. Every effort has been made to ensure that the policies contained within this, the latest version of the Neighbourhood Plan, reflect the views of the majority of Sherington residents.

The Sherington Neighbourhood Plan will become part of the Development Plan for Milton Keynes, and the policies contained within it then used by Milton Keynes Council to determine planning applications within the parish.

Sherington Parish Council would like to thank the members of the steering group and pay tribute to their hard work and commitment since January 2015. The parish council is also grateful for the help and the engagement of many others in the village, without whom it would not have been possible to produce this Neighbourhood Plan.

William Bush, Chair, Sherington Parish Council

1. Introduction

Historical Context of the Village

1.1 Sherington lies between Newport Pagnell and Olney, within Milton Keynes District. The village has a population of around 950 and takes its origins back to an Iron Age settlement in 800 BC. The village was referred to in the Domesday Book at ‘Seritone’, and saw the basic shape of the village as it is seen today laid down in the 1300s.

Figure 1: Sherington historical context, Ordnance Survey map c1900

1.2 Assessments of the village have been undertaken by successive parish councils in the 1970’s, 1980’s, and early 2000’s. A consistent theme throughout these assessments has been the recognition that the open structure of the village has been one of its most important features. The Village Plan and Conservation Area Appraisal, 1972 highlighted this as:

“In spite of infilling and growth over the years Sherington still retains much of the open structure and basic shape laid down in about 1300. The surrounding countryside flows into the heart of the village at numerous points and these also afford good views outward over the pleasant landscape.”

- 1.3 The original buildings in the village were of stone and many fine examples of these still exist. High Street, the nucleus of Church End and Park Road contain many of these old stone buildings, which, together with several 19th Century red brick buildings give these areas considerable character.

“The road pattern within the village is virtually the same as in the 14th Century. A major and minor route from the south converge to the north of the village, these are linked by the village roads running east to west.”

- 1.4 The village is currently served by four entry points - High Street North, High Street South, Gun Lane, Bedford Road. High Street was the main road between Newport Pagnell and Wellingborough, although traffic has been reduced following the construction of the A509 bypass in the late 1970s.

- 1.5 These areas, with the important open space between High Street and St Laud’s Church, are within the Conservation Area (Figure 2). There are 36 listed buildings and two recorded scheduled ancient monuments within the Neighbourhood Plan area.

- 1.6 It was highlighted in the Village Plan and Conservation Area Assessment, 1972 that from an archaeological point of view, the three open fields to the north, south and west of the Church are well worth preserving as open space. It also states that:

“The area between High Street north of the Knoll and the Church still remains open and should be considered inviolate.”

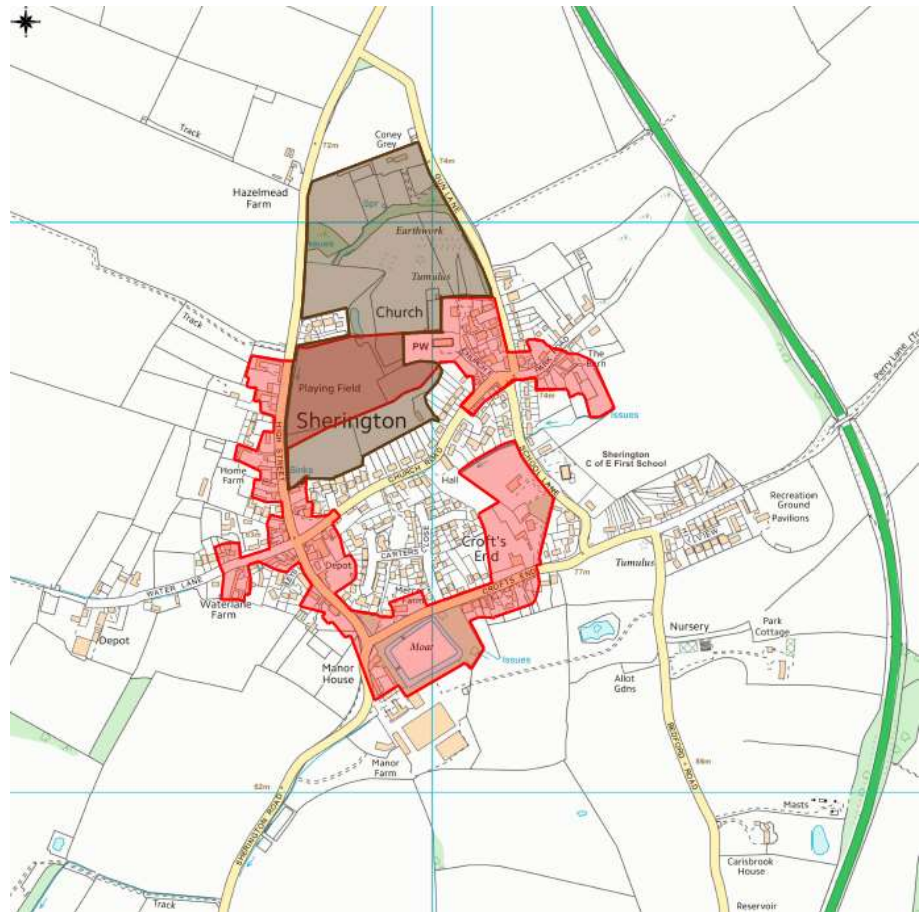

Figure 2: Sherington Conservation Area (red shading) and Article 4 Direction (brown shading)

- 1.7 The importance of the traditional field pattern to the north of the village was confirmed in 1976 when an Article 4 Direction was confirmed. The Draft Sherington Plan of 1982 explained that:

“In 1976 an Article 4 Direction was confirmed, relating to land to the north and west of St Laud’s Church between Gun Lane and High Street. In view of the exceptional importance of the site in terms of landscape quality and its location with regard to views of the into and out of the Conservation Area.”

- 1.8 The boundary of the Article 4 Direction was extended to the south to include all the land up to the rear of the existing properties along the north side of Church Road.

Purpose of the Neighbourhood Plan

- 1.9 In April 2012, the Localism Act 2011 amended the Town and Country Planning Act 1990 introducing new rights and powers to allow local communities to shape new development in their community by preparing a neighbourhood plan.
- 1.10 The Neighbourhood Plan will shape the future growth of the village by allocating sites for development. It will also protect important spaces from development and will ensure that the necessary infrastructure and community facilities are in place to support the future needs of the village.

Basic Requirements of the Neighbourhood Plan

- 1.11 Whilst there is considerable scope for the local community to decide the content of the Neighbourhood Plan and the policies therein, the plan must meet basic conditions. These are to:
- have appropriate regard to national planning policy.
 - promote the principles of sustainable development.
 - be in general conformity with the Development Plan policies for the local area.
 - be compatible with EU obligations, for example environmental and human rights legislation.

The Submitting Body and the Designated Area

- 1.12 This neighbourhood plan is submitted by Sherington Parish Council, which is a qualifying body as defined by the Localism Act 2011.
- 1.13 In accordance with Part 2 of the Regulations, Sherington Parish Council applied to Milton Keynes Council to designate the parish as a neighbourhood area for the purposes of producing the Neighbourhood Plan. This application was approved on the 21st April 2015. The Neighbourhood Plan covers the whole of the parish of Sherington, as defined by Figure 3.

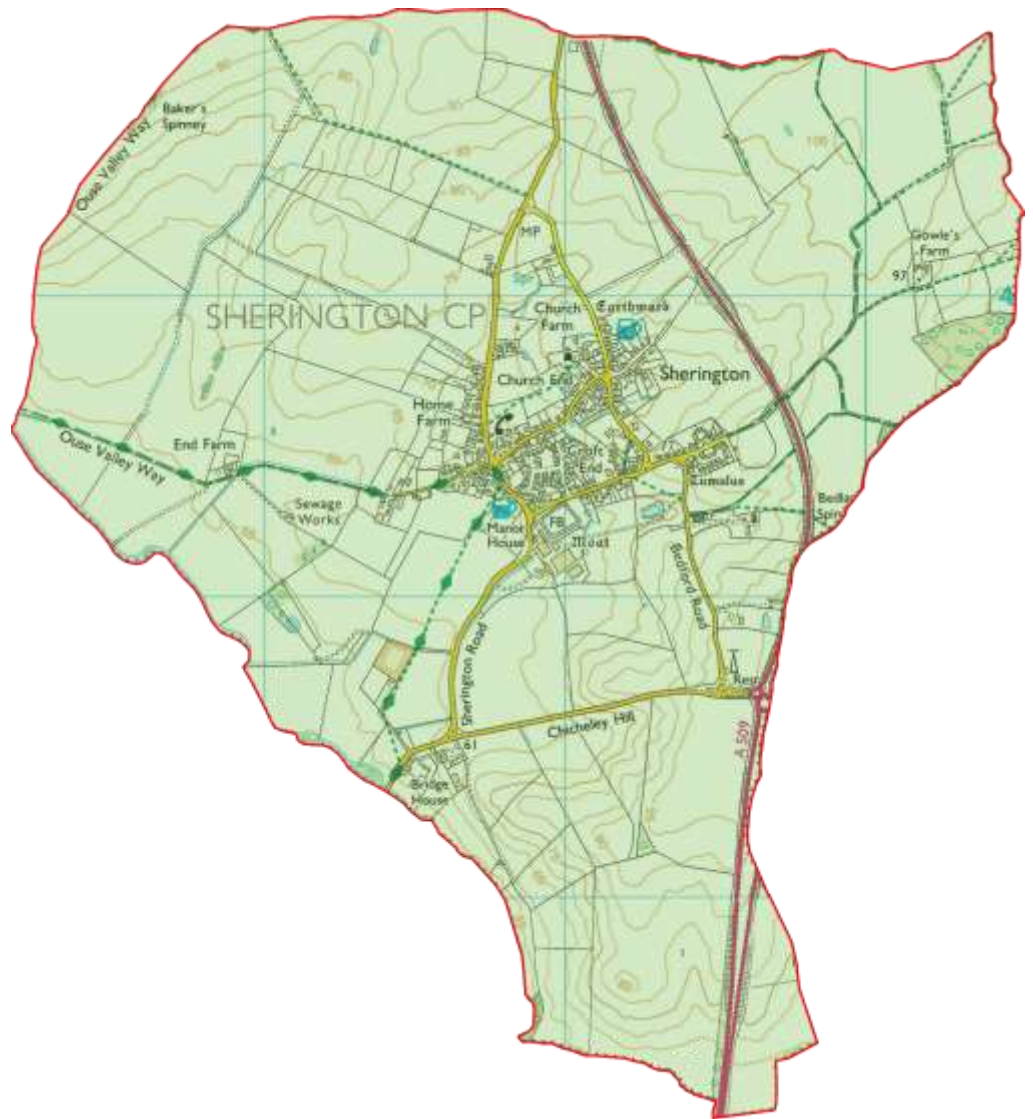

Figure 3: The designated Sherington Neighbourhood Plan area

Planning Policy Context

- 1.14 The National Planning Policy Framework (NPPF) was published in 2012. The Neighbourhood Plan must demonstrate that it is consistent with the approach suggested by the NPPF. Paragraphs 183 to 185 concern neighbourhood plan production and highlight the benefits that neighbourhood plans offer to local people to ensure that they get the right type and amount of development for their community. A neighbourhood plan should reflect the strategic policies in the local plan and should plan positively to support them.
- 1.15 Once a neighbourhood plan has shown that it generally conforms with the Local Plan's strategic policies and is brought into force, its policies take priority over non-strategic policies in the local plan where they are in conflict.

- 1.16 The Milton Keynes Development Plan currently comprises the Core Strategy adopted in 2013 and the saved policies of the Milton Keynes Local Plan, 2005. The strategic policies that are relevant to Sherington are the Core Strategy policies CS1 ‘Development Strategy’ and CS9 ‘Strategy for the Rural Area’.
- 1.17 Core Strategy Policy CS1 seeks to focus housing growth within Milton Keynes City and the key settlements of Newport Pagnell, Olney and Woburn Sands. Sherington is designated as a ‘selected village’, where more limited growth was planned, in the order of 20 to 40 dwellings.
- 1.18 Policy CS9 of the Core Strategy provides the strategy for the rural area, and identifies Sherington as a ‘selected village’. It states that a site(s) will be identified for a limited amount of housing development through the site allocations plan.
- 1.19 Policy CS9 then continues to say that appropriate infill development and conversions will be allowed in villages with development boundaries. An update of these boundaries will take place through the site allocations plan and Plan:MK. Conversions will not be at the expense of key rural facilities, which will be protected from redevelopment for other uses. Encouragement is given in the policy to new development that provides rural employment, farm diversification and the reuse of rural buildings.
- 1.20 Sherington lies within an area designated by Milton Keynes Council as an Area of Attractive Landscape (AAL). In Areas of Attractive Landscape, the countryside outside of the built-up limits of settlements is subject to strict controls over development to conserve the special character and appearance of the area.

Implications for the Neighbourhood Plan

- 1.21 It was evident and accepted that the village would have to allocate additional housing development to comply with the Core Strategy. This issue was brought to the fore by a development of 36 houses allowed at appeal, on land adjacent to High Street to the north of the village centre.
- 1.22 The Parish Council therefore supports the view that the Neighbourhood Plan should allocate the land covered by this appeal decision and one other housing site. This would take the housing land supply for Sherington beyond that envisaged by the Core Strategy. When coupled with the potential for additional

windfall development within the settlement boundary, it is considered that this is a robust approach and there would be no further requirement in the short to medium term to allocate any other additional housing sites.

- 1.23 Looking to the future, work has commenced on Plan:MK. This will replace both the Core Strategy and the saved policies of the local plan and take the plan period forward to 2031. The Neighbourhood Plan and site allocations will be reviewed to ensure conformity with Plan:MK at the appropriate time.

Plan Period, Monitoring and Review

- 1.24 The Sherington Neighbourhood Plan will form part of the Milton Keynes Development Plan documents and will run concurrently with the Milton Keynes Core Strategy until 2031.
- 1.25 The Sherington Neighbourhood Plan is a response to the needs and aspirations of the local community as understood today. It is recognised that current issues and challenges are likely to change over the plan period and a review of the plan to accommodate new priorities may be necessary.
- 1.26 Sherington Parish Council, as the qualifying neighbourhood plan authority, will be responsible for maintaining and periodically reviewing the plan. This will ensure that it remains relevant and conforms with other Milton Keynes Development Plan documents and national planning policy.

2. The Plan Making Process

- 2.1 Preparation of the Neighbourhood Plan commenced in February 2015 and has involved an extensive amount of consultation and engagement with the local community, land owners and interested parties.
- 2.2 A consultation statement has been prepared alongside the Neighbourhood Plan detailing each stage of consultation, tabling responses received and the actions taken by the NPSG to shape the next iteration of the Neighbourhood Plan.
- 2.3 One of the key consultation stages that defined the direction taken by the Neighbourhood Plan was the parish survey commencing in August 2015. The survey built upon the outcomes of the initial consultation events, which had identified key issues, and asked the residents and businesses within the parish for their opinions on several themes and topics.

Summary of the Parish survey results

- 2.4 The key headlines and themes that emerged from the parish survey were:
 - a shared vision and core values for the village including: respect for the rural location and the countryside; a sense of community; peace and tranquillity; a safe atmosphere;
 - recognition that future development could bring some benefits including: protection of the wider countryside; shops and services; village identity and sense of community; variety of housing; a more balanced age and income balance within the community;
 - concerns regarding the impact of new development including: the loss of countryside between existing settlements; demands placed on drainage and sewage systems; reduction in the amount of green space; increased traffic;

- priorities in infrastructure investment including: investment in sewage and drainage systems; improved roads; pavements and footpaths;
- key features which residents would like to protect including: the land around St Laud's Church; the Knoll; the White Hart; the historic open land at the heart of the medieval village;
- community facilities and spaces important to the respondents including: The Knoll; recreation area (Church Road); public footpaths; the open view of the Church from High Street; the pavilion and sports field.

2.5 In respect of future housing growth, the survey asked respondents their views on the number of homes that could be accommodated within Sherington between 2015 and 2031:

- 43% of respondents wanted to see no more than 20 homes;
- 30% of respondents considered a limit should be set at up to 30 homes;
- 14% of respondents would set a limit at up to 40 homes;
- 10% agreed with a limit of up to 50 homes;
- 3% wanted more than 50 homes.

2.6 Survey respondents were also asked about the size of housing developments to meet local needs in the village:

- 41% supported small developments (limited to 10 houses);
- 31% supported medium-sized schemes (10 to 25 houses);
- 19% supported a large scheme of >25 houses;
- 9% support other sizes;
- when asked about the type of housing, preference was expressed for houses and bungalows of 1 to 4 bedrooms, with less support given to flats.

2.7 Respondents stated that house building should be prioritised in the following locations, in order of preference:

- brownfield sites within the village boundary;
- reuse of brown field sites outside of the village boundary;
- controlled extension of the current village boundary.

2.8 Regarding the style of housing in a new development, respondents expressed a preference for stone-fronted houses; followed by brick; then heritage features over modern or eco-housing.

2.9 It was clear that there was support for new development within the village and that the majority of respondents believed that this should be up to 40 new dwellings or less. Preference was also expressed to locating development on brownfield sites, before considering greenfield locations.

3. Vision and Objectives

Challenges for Sherington

3.1 The Neighbourhood Plan seeks to address, as far as is possible, the challenges that face the community of Sherington. In summary, these currently include:

- ensuring that the village does not lose that essential village character, whilst managing the pressure for new development;
- protecting the rural nature of the village and historic open structure, taking the opportunity to preserve and enhance the green spaces that are so important to the character and fabric of the village;
- retention of community facilities, recognising what these are and ensuring they are adequately protected;
- improvement of facilities for community groups, ensuring that facilities continue to be maintained to a suitable standard to support a range of community activities;
- addressing the housing needs of younger and older members of the community, ensuring that the housing developed can provide adapt to a range of needs;
- the need for increased sustainability reducing the energy demands of homes in the village and encouraging the use of renewable energy;
- supporting new appropriately-sited employment opportunities, particularly for rural start-up businesses that need premises;
- protecting and enhancing the character of Sherington by ensuring new development is harmonious to the character, built form and materials used with the village.

Vision

- 3.2 To ensure that the development of Sherington over the next 15 years unfolds in accordance with the wishes of those living and working in the parish.
- 3.3 To maintain Sherington's special rural character, whilst enriching it through thoughtful new development of housing, business and social amenities, thus securing the future of the village as a vibrant, sustainable rural community.

Objectives

- 3.4 The objectives of the Sherington Neighbourhood Plan as identified through engagement with the local community are as follows:

Objective 1: Local Green Space, Environment and Biodiversity

- 3.5 To protect the environment of the Parish by:
 - preserving its distinct rural identity and outstanding landscape setting;
 - preserving important Local Green Space, particularly those important to the setting of the historic core of the village;
 - maintaining or enhancing the historic fabric and heritage assets within the village;
 - seeking opportunities and requiring development to enhance the quality of the environment within the village, including biodiversity and wildlife networks;
 - ensuring development does not adversely impact upon key views and preserves natural features;
 - requiring development to be sustainable and incorporate elements of renewable energy technology where appropriate;
 - Requiring development to be safe from flooding and not exacerbate the risk of flooding elsewhere.

Objective 2: Community Facilities

3.6 It is recognised that the community facilities within the village play a key role in making the village the place that it is, and offer a focus for village life. Community facilities will be protected and improved by:

- supporting key community services and facilities, including the village shop, the White Hart public house, school, church, recreation areas, pavilion and village halls;
- expecting new development to contribute to the support and enhancement of community facilities. This includes the aim to provide new permanent premises for the village shop as part of a community hub in the heart of the village;
- strongly resisting proposals that involve the loss of a key community facility through change of use or redevelopment, unless an enhanced alternative can be provided.

Objective 3: Highways and Transport

3.7 The Neighbourhood Plan will encourage the provision of:

- improved facilities to allow safer walking and cycling around the village;
- schemes to reduce vehicle speeds on the main roads within the village, including traffic-calming initiatives;
- off-road car parking where this can be achieved without adverse impacts on the character of the village streets.

Objective 4: Housing

3.8 All proposals for new housing will be expected to:

- reflect the wishes and needs of the community in relation to scale, location and mix of dwellings;
- contribute to meeting the housing need for those with local connections to the parish;
- maintain a mix of house types, house styles, varied tenures and settings within the existing environment.

Objective 5: Local Economy

3.9 Employment is important to the sustainability of the village, ensuring Sherington maintains an inclusive, well-balanced community. The Neighbourhood Plan will support appropriately-sited employment development by:

- supporting local businesses and positively encouraging employment opportunities, including home working. This will be subject to consideration of the impact upon neighbour amenity;
- helping local businesses to flourish unless proposed development would be detrimental to the environment or landscape;
- supporting the development of new premises and infrastructure that enables existing and new businesses and organisations to set up and thrive in the parish.

4. Planning Policies

Background

- 4.1 Central to the policies of the Neighbourhood Plan is the desire to reflect the wishes of current residents and the work undertaken by previous generations of parish councils, and preserve the open character and green spaces within and around the village. At the same time, it is recognised that new development is needed to meet the future needs of the village, but this must be accommodated in a manner that does not harm those parts of the village that are most important.
- 4.2 This Neighbourhood Plan deliberately avoids repeating existing national or local planning policies where they do not relate specifically to Sherington. The proposed policies therefore focus on a relatively small number of key development issues in the area.
- 4.3 For all other planning matters, the national and local policies of other planning documents - the National Planning Policy Framework, the 2013 Core Strategy and the saved policies of the Milton Keynes Local Plan, 2005 - will continue to be used.
- 4.4 Set out below are the policies of the Neighbourhood Plan, which are supported by designations on the Proposals Map. The Proposals Map can be found at Appendix D.

5. Settlement Boundary

- 5.1 The responses to the community survey highlighted the need to protect the rural nature of Sherington, maintain its special character and preserve the surrounding countryside.
- 5.2 Mindful of the objectives set out in Section 3 of the Neighbourhood Plan, it has been determined that new development should be focused upon the existing main built-up area of the village. This is in preference to development being dispersed elsewhere across the rural areas of the parish.

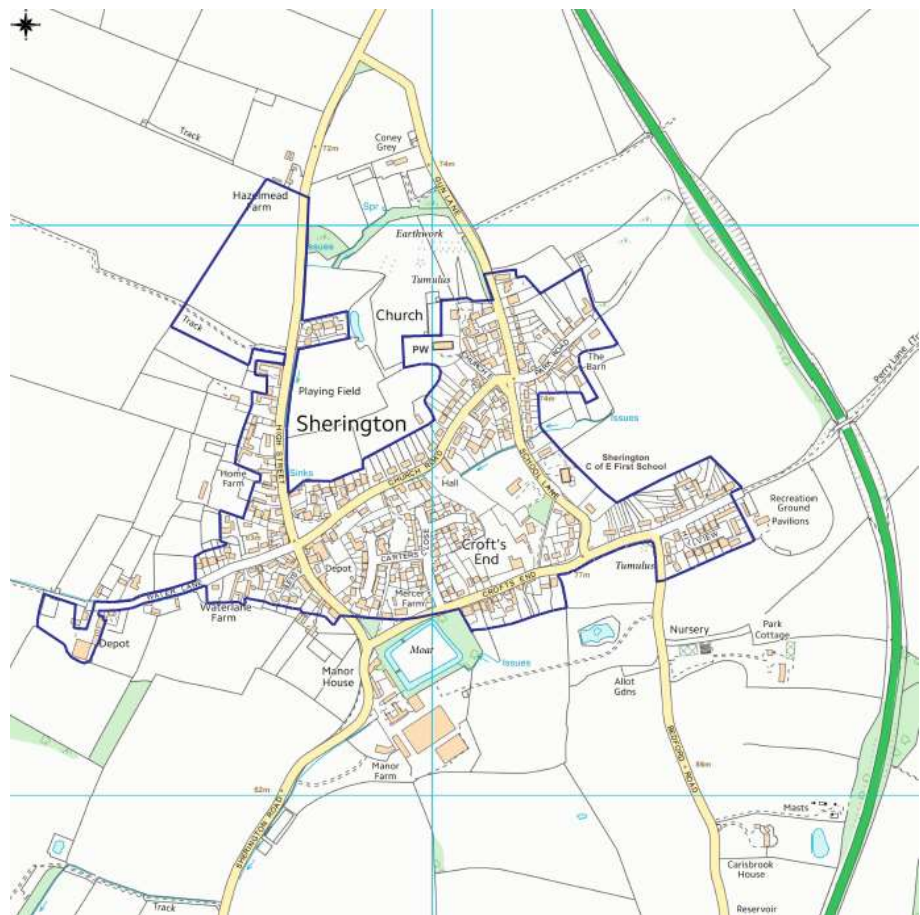

Figure 4: Sherington Settlement Boundary

5.3 Due consideration has been given to whether the settlement boundary (Figure 5) should be changed to include new development allocations proposed by the Neighbourhood Plan.

5.4 Sherington is defined within the Milton Keynes Core Strategy as a 'selected village'. A settlement boundary was defined by the 2005 Adopted Local Plan. The same settlement boundary has been applied in the Neighbourhood Plan, except where it has been extended to include the two allocated development sites, as covered by:

- Policy NP7: Land adjacent to High Street
- Policy NP8: Land adjacent to Water Lane.

Policy NP1: Sherington Settlement Boundary and Development Principles

The Neighbourhood Plan defines the Sherington village development boundary, as shown on the Proposals Map, to shape the physical growth of the village over the plan period.

There is a presumption in favour of sustainable development within the settlement boundary, provided that development complies with the provisions of the Sherington Neighbourhood Plan and the Milton Keynes Development Plan.

Development proposals, including windfall infill development, will be expected to fulfil the aims and objectives of the Neighbourhood Plan by:

- *preserving and enhancing the character and appearance of the conservation area and the setting of listed buildings and other heritage assets;*
- *ensuring the rural character of the village is maintained and its important green spaces are not eroded;*
- *positioning development to maintain important views within the village and respect the wider landscape setting of Sherington.*

Policy NP1 Continued...

New housing allocations made by the Neighbourhood Plan have been defined on the proposals map as an extension to the existing settlement boundary.

Development proposals outside of the settlement boundary will only be supported if they comply with the provisions of the Sherington Neighbourhood Plan and Milton Keynes Development Plan in respect of the control of development in the countryside.

Neighbourhood Plan objectives addressed by Policy NP1: 1, 4, 5.

6. Local Green Space

- 6.1 Sherington has countryside extending into the heart of the village that establishes its open structure and rural character. Successive parish councils and the community today wish to maintain that structure and recognise the important role that these spaces have in terms of visual amenity and local recreation.
- 6.2 To protect important land from development paragraph 77 of the NPPF highlights that neighbourhood plans can designate Local Green Space that are important to the area. The NPPF continues to say that Local Green Space should only be designated in the following circumstances:

“Where the green space is in reasonably close proximity to the community it serves;

Where the green area is demonstrably special to the local community and holds particular local significance, for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife; and

Where the green area concerned is local in character and is not an extensive tract of land.”

- 6.3 Where sites have been designated as Local Green Space (Figure 5), the following criteria have been carefully considered:
- an assessment of landscape quality, whether the land includes historic field patterns and hedgerows, as opposed to modernised large fields;
 - consideration of public access and footpaths running across the land;
 - the value of the land for public recreation and visual quality;

- the contribution the land makes to the setting and structure of the village;
- if the land includes or forms part of the setting of heritage assets, such as listed buildings, scheduled ancient monuments and the conservation area;
- if restrictions or constraints cover the land that would restrict development, such as the Sherington Article 4 Direction.
- the historical context of the land in previous village plans and assessments;
- the potential biodiversity of the land and contribution it makes to attract wildlife to the village.

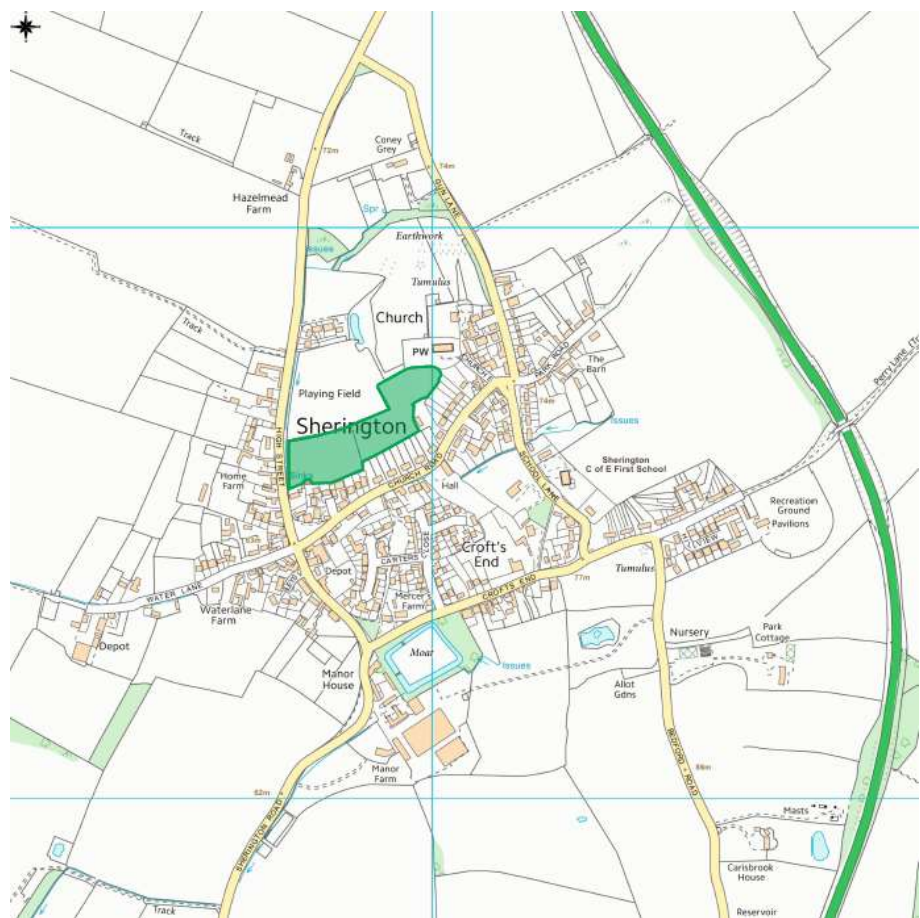

Figure 5: Local Green Space, shown in green.

- 6.4 Having considered the green spaces within and surrounding the village against the criteria highlighted above, it has been decided to designate two areas as Local Green Space. They should be protected from future development.
- 6.5 The openness of these spaces should be preserved for their landscape value, recreation value and the contribution that they make to the setting of nearby heritage assets and listed buildings.

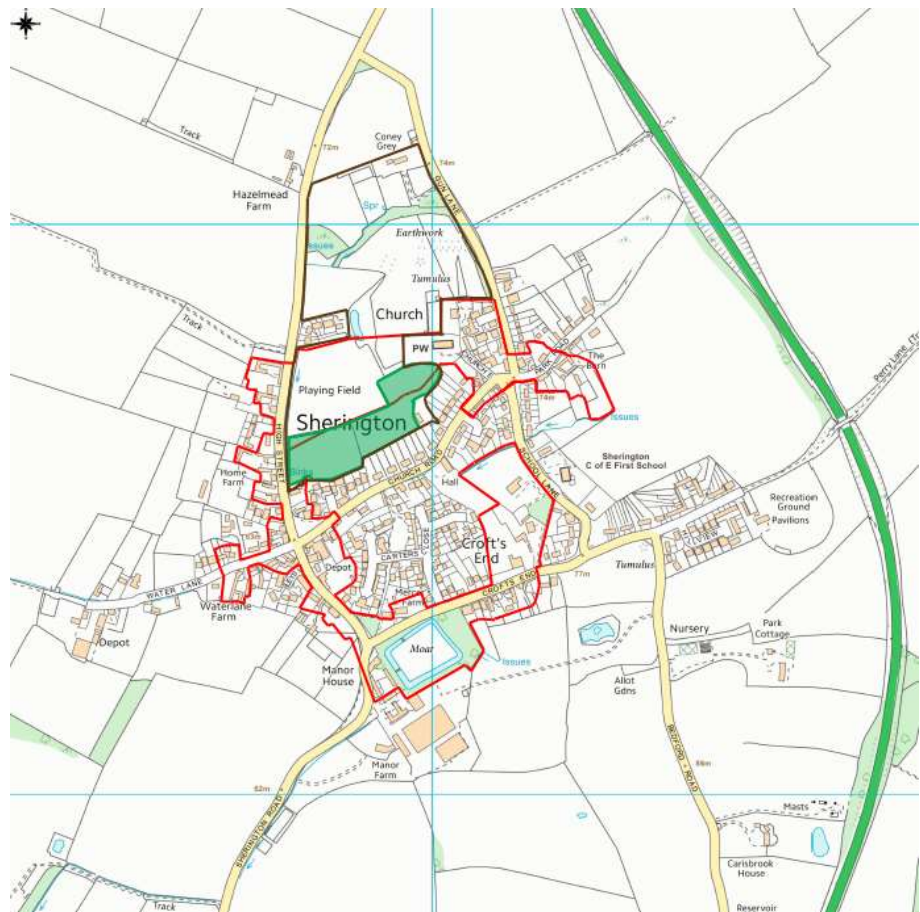

Figure 6: Local Green Space, shown in green (with the conservation area in red and Article 4 Direction area in brown).

- 6.6 The land between Gun Lane and High Street represents part of the original form of the village, extending the countryside into the heart of the settlement. This land has been identified as important to the settlement pattern in several village plans and appraisals dating back to the early 1970's, and has consistently been protected from development.
- 6.7 The land has also been used extensively for decades by village residents, not only from the footpath but also pathways around the perimeter of the fields and within woodland planted by the landowners. Sherington has limited amounts of public access land, highlighting the importance of preserving land that is used from development
- 6.8 There is an Article 4 Direction covering the land that restricts permitted development (Figure 6). This designation was imposed to preserve the setting of the village and prevent uncontrolled development in this area. This situation remains as important today as it was when the direction was made.
- 6.9 For these reasons, the designation of these two areas of Local Green Space is consistent with the requirements of the NPPF.

Policy NP2: Local Green Space

The Neighbourhood Plan designates the following locations as Local Green Space (as shown on the proposals map):

- land east of the High Street adjacent to Knoll Close; and*
- land south west of St Laud's Church.*

Proposals for development within designated areas of Local Green Space will not be supported unless they relate to a function that supports public recreational use or are required to by a statutory undertaker for infrastructure purposes.

Neighbourhood plan objectives addressed by Policy NP2: 1.

7. Biodiversity

- 7.1 The western areas of the parish fall within land covered by the Ouse Valley Biodiversity Opportunities Area Statement (BOA) from the Buckinghamshire and Milton Keynes Biodiversity Partnership.
- 7.2 Sherington has numerous fine trees that are an important part of the green and leafy character within the village, particularly when seen in the context of views across the valley. Nevertheless, whilst located in the midst of a rural environment the parish is recognised to lack bio-diversity.
- 7.3 The surrounding fields to the east and west of the village have been modernised over time and subject to hedgerow removal, reducing the biodiversity of the surrounding rural landscape.
- 7.4 It is therefore important to protect those fields with original hedgerow patterns and to seek out opportunities for enhancements to be made within the village and the surrounding wider parish.
- 7.5 The Parish Council in conjunction with the local community aim to improve the environment of Sherington and enhance the biodiversity of the village and the surrounding area.

- 7.6 To provide a greater range of grassland habitat and ecology, and enhance the landscape value, the Parish Council intend to establish a wild flower meadow using a technique generally known as yellow rattle planting.
- 7.7 Once a site with suitable ground conditions has been identified and all permission and agreement obtained it is intended that the scheme will be implemented as part of a Natural England sponsored programme and in accordance with Natural England Technical Information Note TIN 060.

Policy NP3: Biodiversity Enhancement

Biodiversity and environmental enhancement proposals will be supported within the village and surrounding parish, where they would create new areas of woodland, hedgerows, ponds and other habitats.

The Parish Council will investigate opportunities to:

- plant additional trees within the village;*
- establish a wildflower meadow;*
- improve the quality of the environment at Stone Pits Copse.*

New development proposals should demonstrate how the scheme would enhance the biodiversity of the site and provide features to attract wildlife.

Sustainable drainage schemes should be combined with semi-natural balancing ponds to provide enhanced habitat.

Neighbourhood plan objectives addressed by Policy NP3: 1, 4.

8. Community Hub and Facilities

- 8.1 This section of the Neighbourhood Plan is to ensure that the existing community facilities within the village are protected and supported.
- 8.2 Community facilities, both in private and public ownership, are very important to village life, fostering a sense of place, meeting local needs for education, shopping, socialising and worship. These facilities all contribute to the day to day activity within the village. The Parish Council will support existing facilities and encourage appropriate improvements that benefit of all users and residents of the parish.

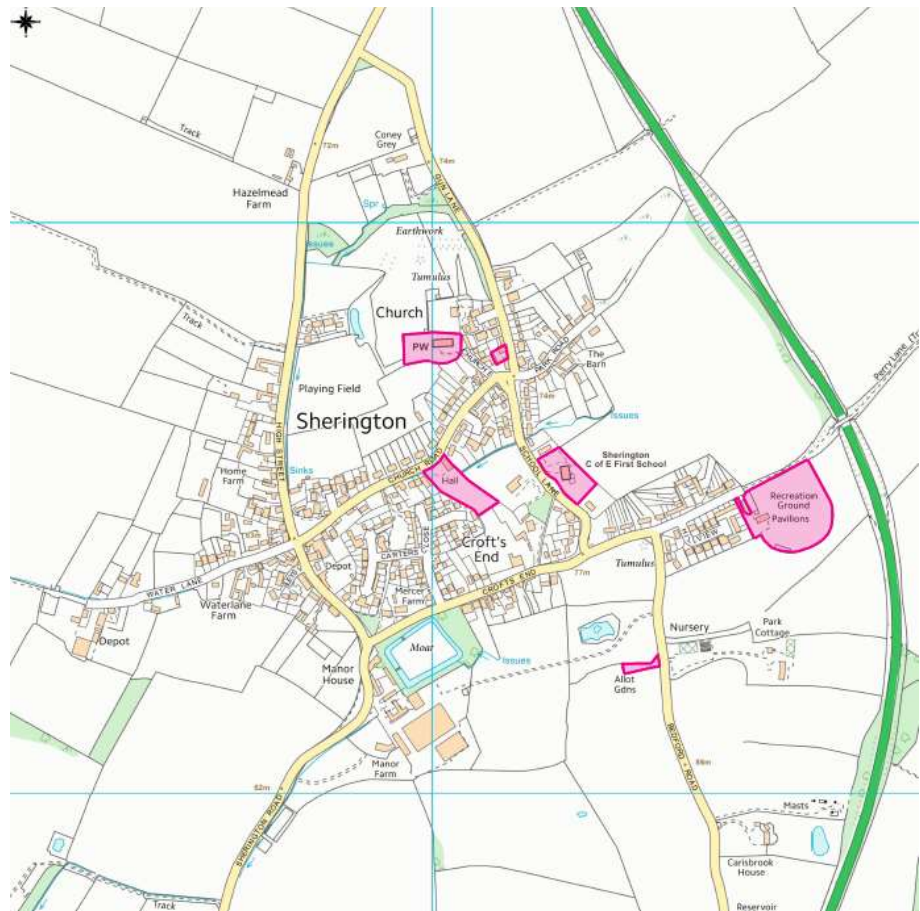

Figure 7: Community facilities

- 8.3 The community facilities can be seen in Figure 7, and include the following:
- St Laud's Church, Church Road
 - The White Hart PH, Gun Lane
 - Village Hall and playing fields, Church Road
 - Village Shop, Church Road
 - Sherington COE School, School Lane
 - Sports Pavilion, Perry Lane
 - Community Allotments, Bedford Road
- 8.4 St Laud's Church, the school, village hall, pavilion and White Hart public house all play a vital role in underpinning the vibrant community of the village.
- 8.5 The closure and change of use of the village store highlighted the need to maintain and support community facilities within the village. These are often vitally important to those less-mobile residents and to those who value the part such facilities play in enabling a more sustainable way of village life.
- 8.6 The village stores have been reopened and are presently housed within a temporary facility adjacent to the village hall. A unilateral undertaking has been given by the landowner of High Street housing site, covered by Policy NP7, to provide funding towards a new shop to serve the village on a permanent basis within the community hub.

Policy NP4: Community Hub and Facilities

Community facilities, as designated on the proposals map, will be supported and improved wherever possible to ensure the day-to-day needs of the village residents can be met.

The existing community facilities will be protected from redevelopment for an alternative use that would erode their function and benefit to the community.

Improvements to community facilities will be supported, subject to the proposal not having a significant adverse impact upon:

- the character of the surrounding area;*
- the setting of listed buildings;*
- any residential amenity in terms of noise, fumes or other disturbance.*

The Parish Council will advance plans for the redevelopment of the existing village store to create a community hub adjacent to the village hall on Church Road. Contributions will be sought from development on allocated sites to support this project.

Neighbourhood plan objectives addressed by Policy NP4: 2.

9. Developer Proposals

- 9.1 The key to a successful development is the early engagement of stakeholders to allow proposals to be shaped to meet local needs and expectations. Planning applications prepared in discussion with the Parish Council, the community and stakeholders, can be focused to address particular local issues that may otherwise not be addressed until after a submission has been made. This allows a positive approach to sustainable development that is in accordance with the requirements of the Milton Keynes Development Plan.
- 9.2 To facilitate this, it will be necessary for developers to make pre-application submissions and engage with the Parish Council before submitting planning applications.

Policy NP5: Developer Proposals

Developers are required to engage in constructive dialogue with the Parish Council early in the process of formulating their plans. This will ensure that their plans reflect the wishes of the community and the objectives and policies contained within the Neighbourhood Plan.

Neighbourhood plan objectives addressed by Policy NP5: 1, 2, 3, 4, 5.

10. Design and Energy-Efficiency

- 10.1 It was evident from the results of the community survey and subsequent public meetings, that preserving the character of the village and that rural feel so special to Sherington is a very important issue.
- 10.2 The Neighbourhood Plan seeks to direct the design of new housing developments, to promote high quality, sustainable development that will integrate well with existing development in the village, both now and in the future.
- 10.3 Such aspirations are supported by the NPPF, which states at paragraph 58 that:

“...neighbourhood plans should develop robust and comprehensive policies that set out the quality of development that will be expected for the area. Such policies should be based on stated objectives for the future of the area and an understanding and evaluation of its defining characteristics. Planning policies and decisions should aim to ensure that developments:

- will function well and add to the overall quality of the area, not just for the short term but over the lifetime of the development;*
- establish a strong sense of place, using streetscapes and buildings to create attractive and comfortable places to live, work and visit;*
- optimise the potential of the site to accommodate development, create and sustain an appropriate mix of uses (including incorporation of green and other public space as part of developments) and support local facilities and transport networks;*

- *respond to local character and history, and reflect the identity of local surroundings and materials, while not preventing or discouraging appropriate innovation;*
- *create safe and accessible environments where crime and disorder, and the fear of crime, do not undermine quality of life or community cohesion;*
- *are visually attractive as a result of good architecture and appropriate landscaping.”*

10.4 A key consideration within the Neighbourhood Plan is to understand how certain areas define the character and feel of that community, and then identify where they are. This will make sure their importance is properly considered when making decisions on future developments.

10.5 The parish is characterised by its varied architectural styles, building density and layout, its road and footpath networks and its geographical setting. Together these elements confirm the village's identity as a small rural settlement.

10.6 The common distinctive character elements are:

- the green spaces that extend into the heart of the village;
- the lanes, footpaths and roads at the limit of the village, which have natural and largely untrimmed hedgerows;
- the height and variety of the historic roof lines and separation between buildings, and their interconnecting views;
- grass verges regularly edge the road, particularly in the older parts of the village;
- the many and varied old and mature trees within the built environment, in both the older and more recently built areas of the village;
- the limited use of white or yellow lines;
- the non-proliferation of road and street signs.

10.7 The design of new buildings within the parish, and in the designated conservation area, are expected to be of high quality and reflect the architectural styles and materials used elsewhere in the village.

Policy NP6: Design and Energy-Efficiency

New development will be supported where it can demonstrate that it:

- respects and protects the village assets, conservation area, the setting of listed buildings and their curtilages;*
- delivers high quality development of architectural merit, distinctive and, where appropriate, individual in character;*
- responds to the heritage and the distinctive features of the area of the parish in which it is situated. In particular, it will reflect the character of the area through height, scale, spacing, layout, orientation, design and materials of buildings;*
- respects the natural contours of a site and, where possible, protects and sensitively incorporates existing natural features such as trees, hedges and ponds that are within the site;*
- ensures that safe, accessible and well-connected routes to the centre of the village are provided;*
- maximises energy-efficiency and incorporate renewable and low carbon energy will be considered favourably;*
- preserves the open and green character of the village and recognises the transition to the countryside. Development located towards the edge of the built-up area boundary should be restricted to a maximum of two storeys in height where development would be prominent against the landscape beyond;*
- includes a programme to deliver a landscaping schemes that can be completed within an agreed timescale following construction completion.*

Neighbourhood plan objectives addressed by Policy NP6 1, 2, 3, 4 and 5.

11. Development Allocations

- 11.1 Sherington is designated in the Milton Keynes Core Strategy as a 'selected village', where development of up to 40 new dwellings could be provided. It was evident that the Neighbourhood Plan would need to allocate additional land for housing to accommodate the requirements of the Core Strategy.
- 11.2 The decision was taken to exceed the figure suggested by the Core Strategy, partly as a result of the appeal decision allowing the development of land to the west of High Street for 36 houses. It was clear that additional allocations would need to be made over and above this figure to ensure that the Neighbourhood Plan robustly meets the future housing needs for the village.
- 11.3 The Neighbourhood Plan makes two allocations for new housing on the edge of the village. These sites have been selected following a site selection process where each proposal suggested at the Landowner Panel Meeting in March 2016 have been assessed alongside other potential housing sites.

Site selection methodology

- 11.4 When considering locations for new development, an assessment of potential options around the village has been undertaken. The sites were assessed on a comparative basis against a range of criteria that included:
- consideration of the potential flood risk of a site in accordance with the NPPF, from fluvial and pluvial flooding, applying the sequential test and exceptions test;
 - applying a clear preference in accordance with the NPPF and the wishes of the community, for development to be located on brownfield sites over and above greenfield development;
 - greenfield sites should be on land that has lower landscape quality, or land that can accommodate change without significant impacts;

- potential sites should not adversely impact upon the historic setting of the village or heritage assets;
- development allocations should avoid unacceptable impacts upon heritage assets and their setting;
- greenfield sites should be sustainable, and well related to the village and existing facilities;
- other factors such as access, utilities, feasibility, land availability, and whether housing could be realistically delivered within the timeframe of the Neighbourhood Plan.

11.5 Having applied these factors to the sites identified at Appendix 1, the following allocations have been made. Planning applications on these sites will be supported subject to their individual policies.

Land adjacent to High Street, Sherington

- 11.6 Land adjacent to High Street, Sherington lies to the north of the village, and is an open field beyond the existing settlement boundary (Figure 8). Outline planning permission has been granted in 2016 for the development of this site, (Planning Ref. 14/02002/OUT). This allowed the construction of 36 residential dwellings subject to details of scale, layout, design and landscaping being agreed. Accordingly, the site has been allocated in the Neighbourhood Plan.

Figure 8: Land adjacent to High Street, new housing allocation

- 11.7 This site is located within Flood Zone 1 and is not identified within the Milton Keynes Strategic Flood Risk Assessment as being at risk from surface water flooding. Accordingly, the site is not at risk of fluvial or pluvial flooding and there would be no requirement to undertake a sequential test or exceptions test for this allocation.
- 11.8 It is a requirement of the Neighbourhood Plan that the development of new open market housing in the village is made available in the first instance to existing village residents or those with a local connection to the parish. A local connection is typically defined as a person within the household who has a connection to a locality or parish.

- 11.9 In general terms, this can be someone who has lived in the Parish for three out of the last five years, or is working, usually 16 hours or more within the Parish. It is also possible to have a local connection if a family member has a proven need to give or receive support from family members. This can be personal or physical care to enable the person to live independently within the community.
- 11.10 This will help to ensure that new development fulfils local housing needs and is not speculatively purchased by investors or persons with no connection to the local community. It will help to prevent those residents who wish to move house being priced out of the housing market and unable to live in their community.

Figure 9: Land adjacent to High Street, new housing allocation

- 11.11 As part of a commitment made to the local community, an offer has been made by the developer to financially support the redevelopment of the village shop. This commitment by way of a unilateral undertaking has been written into Policy NP7 to ensure that the support can be delivered.

Policy NP7: Land adjacent to High Street, Sherington

Land adjacent to High Street within the area defined on the proposals map will be supported for the development of up to 36 dwellings.

Prior to the approval of details for the development, a mechanism will be agreed to enable purchasers with an established local connection to the parish of Sherington to have first option on the open market housing. This will be for a period of 3 months from the development being released to market.

Affordable housing provided within the site will include a mix of dwelling sizes and tenures in accordance with the requirements of Milton Keynes Council.

A planning application to establish the details of this scheme will be expected to include:

- a balanced housing mix, including dwelling size and tenure to meet the needs of the local community;*
- details of the design of the new dwellings, layout of the site, and materials to be used, including doors and windows;*
- details of the landscaping scheme, which will be discussed and agreed between the Parish Council and Milton Keynes Council;*
- measures to ensure that the new homes are highly energy-efficient. This includes the use of appropriate elements of low carbon and renewable energy technology to minimise the carbon footprint of the new development;*
- details of any residual land not used for housing development . This should be retained as open space to improve public access to amenity land;*
- measures to enhance the biodiversity of the site and ensure that the negative environmental effects of the development are minimised. This includes features such as bird and bat boxes, the use of sustainable drainage systems and balancing ponds designed to create wildlife habitats;*

Policy NP7 continued...

- *a financial contribution that shall be made prior to the occupation of the development to support community assets within the village. This will include a unilateral contribution to the redevelopment of the village shop;*
- *access taken from a single point onto High Street;*
- *traffic-calming measures along High Street and the entrance to the village. These should be investigated as part of the planning application, to reduce vehicle speeds near the application site.*

Neighbourhood plan objectives addressed by Policy NP7: 1, 2, 3, and 4.

Land at Water Lane, Sherington

- 11.12 Land at Water Lane, Sherington is a brownfield site (Figure 10). It is currently in use for employment purposes and outdoor storage of vehicles and other materials. The site is visually unattractive and has a run-down appearance and its redevelopment for a limited amount of new housing would be achievable without significant adverse impacts.
- 11.13 The land at Water Lane is brownfield, previously developed land. The principle of redevelopment of the land for housing would therefore be supported in principle by National Planning Policy and the Milton Keynes Development Plan. Allocating this site for development has allowed more greenfield land to be protected. It also allows land more important to the structure of the village and land with community or heritage value to be preserved.

Figure 10: Land at Water Lane, new housing allocation

- 11.14 The site has not been identified as being at risk of fluvial flooding and is categorised as being within Flood Zone 1. The Milton Keynes Strategic Flood Risk Assessment has identified a risk of pluvial flooding of the site, caused by surface water run-off along Water Lane during storm events.

Figure 11: Land at Water Lane, new housing allocation

- 11.15 The Water Lane site has therefore been considered against other sites in the village in accordance with the sequential test to determine if other sites not at risk of flooding are available.
- 11.16 There are no other brownfield sites available within the settlement boundary of Sherington of a comparable size. It is core objective of the Neighbourhood Plan to protect the Local Green Space and greenfield sites surrounding the village. Accordingly, there are other reasons such as environmental factors, heritage impacts, concerns over connectivity and sustainability that would rule out the allocation of a greenfield site in place of a brownfield site.
- 11.17 It is also understood that Anglian Water have improved the drainage situation along Water Lane by removing tree roots blocking existing drains and alternations made to the road camber to direct surface water away from the allocated site. The risk of surface water flooding has been significantly reduced and could be mitigated by the redevelopment, and there is the potential for improvements to be made to the benefit of the wider area.

- 11.18 The settlement boundary has been amended to incorporate the developable area of this site and exclude land surrounding the site, which is considered to remain outside of the village settlement boundary and within the open countryside.
- 11.19 As specified within the supporting text to Policy NP7, it is a requirement of the Neighbourhood Plan that the development of new open market housing in the village is made available in the first instance to existing village residents or those with a local connection to the parish.
- 11.20 In general terms, this can be someone who has lived in the Parish for three out of the last five years, or is working, usually 16 hours or more within the Parish. It is also possible to have a local connection if a family member has a proven need to give or receive support from family members. This can be personal or physical care to enable the person to live independently within the community.

Policy NP8: Land at Water Lane, Sherington

Land to the south of Water Lane within the area defined on the proposals map will be supported for the development of up to 9 dwellings.

Prior to the approval of details for the development, a mechanism will be agreed to enable purchasers with an established local connection to the Parish of Sherington to have first option on open market housing. This will be for a period of 3 months from the development being released to market.

Should affordable housing be provided within the site, then this should include a mix of dwelling sizes and tenures.

A planning application submitted for the redevelopment of this site should incorporate:

- a balanced housing mix, including dwelling size and tenure to meet the needs of the local community;*
- details of the design of the new dwellings, layout of the site, and materials to be used, including doors and windows;*
- details of the landscaping scheme, which will be discussed and agreed between the Parish Council and Milton Keynes Council;*

Policy NP8 Continued...

- *measures to ensure that the new homes are highly energy-efficient. This includes the use of appropriate elements of low carbon and renewable energy technology to minimise the carbon footprint of the new development;*
- *measures to enhance the biodiversity of the site and ensure that the negative environmental effects of the development are minimised. This includes features such as bird and bat boxes, the use of sustainable drainage systems and balancing ponds designed to create wildlife habitats;*
- *appropriate mitigation measures to minimise the risk of flooding on the site and also ensure that the risk of flooding elsewhere is reduced and not exacerbated;*
- *a financial contribution entered into prior to the occupation of the dwellings to support community facilities within the village;*
- *details of the access arrangements which should be taken from a single point on Water Lane;*
- *details of improvements to Water Lane, including the provision of traffic calming, passing places and sections of pavement where possible.*

Neighbourhood plan objectives addressed by Policy NP3: 1, 2, 3, and 4.

Future Allocations and Growth of Sherington

- 11.21 The allocations made in policy NP7 and policy NP8 are expected to meet the short- to medium-term housing needs of the village. Between them they will deliver up to 45 dwellings. This exceeds the upper limit of the housing allocation suggested by the Milton Keynes Core Strategy 2013, of 40 dwellings.
- 11.22 When coupled with the potential for additional windfall development within the settlement boundary, they are sufficient to meet the needs of the village for the plan period.
- 11.23 An assessment of suggested sites and sites with development potential has been undertaken, and led to the selection of the two favoured allocations. As Plan:MK advances, it may be necessary to review the Neighbourhood Plan to ensure that it remains consistent.
- 11.24 Should it be necessary, consideration will be given to further housing allocations being made. Priority will be given to sites that are on brownfield land within the settlement boundary first and foremost, followed by greenfield sites that are well related to the village and do not create significant adverse landscape impacts. In all cases, consideration will be given to the impact of a future allocation upon heritage assets, areas of land important to the local community and the potential for harm to the surrounding biodiversity.

12. Local Economy and Employment

- 12.1 One of the key themes in the NPPF is supporting a prosperous rural economy. Paragraph 28 states:

“Planning policies should support economic growth in rural areas in order to create jobs and prosperity by taking a positive approach to sustainable new development.”

- 12.2 Over the plan period, it is considered vital to support local services and businesses in order that they may create employment opportunities for residents and local people.
- 12.3 Sherington is in a rural location. It is considered appropriate to encourage small-scale businesses that supports rural enterprise and/or benefit the local community. Many of these businesses will be start-ups and for these people, having access to low-cost premises on flexible rents is of paramount importance. The provision of such flexible space within the parish will therefore be welcomed.
- 12.4 Another feature of the local economy is the enduring, but adapting, agricultural base. Whilst relatively small, it does provide local employment and makes effective use of the land. It is also adapting to new trends with the opening of farm shops, for example. Such enterprises should be encouraged rather than stifled.
- 12.5 Support will therefore be given to proposals which demonstrate an active approach to providing sustainable commercial activity within the context of a rural parish.

Policy NP9: Local Economy and Employment

Development proposals will be supported that allow existing and suitable new, small-scale service businesses to thrive in Sherington parish.

In particular, the Neighbourhood Plan will support:

- applications to change land use or use of buildings to accommodate existing businesses experiencing growth or displaced by development elsewhere in the parish;*
- proposals for developing new businesses or expanding existing businesses provided they are appropriate to their rural setting, reflect as appropriate the character of the village, and/or the countryside within the parish;*
- proposals that provide premises suitable for use by start-up or incubator businesses;*
- proposals that will result in no more than a minimal increase in light, noise and air pollution.*

Neighbourhood plan objectives addressed by Policy NP9: 1, 3 and 5.

13. Implementation

- 13.1 The Neighbourhood Plan will be implemented through the consideration of development proposals and planning applications.

Development Management

- 13.2 Most of the policies contained in the Neighbourhood Plan will be used by landowners and developers to help shape development proposals. In preparing the plan, careful consideration has been given to ensure that the policies are achievable.
- 13.3 Whilst the Local Planning Authority will be responsible for development management, the parish council will use the Neighbourhood Plan to frame its representations on submitted planning applications. It will also work with Milton Keynes Council to monitor the progress of sites coming forward for development.

Infrastructure Projects

- 13.4 The Parish Council proposes some or all of the projects listed below for investment of future Section 106 financial contributions or Community Infrastructure Levy (CIL) funding allocated by the Local Planning Authority to the Parish Council:
- Creation of a permanent village shop as part of the new community hub. This will replace the temporary unit that currently provides groceries and Post Office services following closure of the original shop on High Street;
 - Improvements to the village hall;
 - Provision if possible of a water supply to serve the allotments off Bedford Road.

- 13.5 Should improvements to village infrastructure also be allowable, the following proposals will be considered:
- Creation of a footway from the A509 redway to link with the Sherington High Street to allow safe passage of pedestrian and cyclists;
 - Construct speed reduction measures along High Street, Church Road and Crofts End including consideration of 20 mph speed zones.
- 13.6 This is not an exhaustive list and will be reviewed over the plan period and further projects may be included.
- 13.7 This series of local infrastructure projects will be prioritised for investment should development in the parish result in the availability of Section 106 financial contributions or should Milton Keynes Council prepare a CIL in the future.
- 13.8 In addition, other policies of the Neighbourhood Plan require some planning obligations to be entered into as part of planning consents. This will finance and deliver specific infrastructure projects relating to the development, to make the scheme satisfactory in line with paragraphs 173 and 204 of the NPPF.

Annex A: Consideration of Potential Housing Site Allocations

Site Ref	S1
Site Address	Land east of Gun Lane
Location Type	Greenfield.
Flood risk designation	Environment Agency mapping: Flood Zone 1. SFRA: No Risk identified.
Land quality and value	Low.
Visual quality	Low.
Heritage constraints	No known features. Would require further investigation to be conclusive.
Accessibility constraints	Remote from footway network.
Utilities constraints	At extremity of village drainage system.
Comments	Edge of village location, site forms part of a larger open field. Limited linear development along Gun Lane could be possible. Development not being pursued by landowner at this stage.
Conclusion	Not to be allocated.

Site Ref	S2
Site Address	Land west of Gun Lane
Location Type	Greenfield.
Flood risk designation	Environment Agency mapping: Flood Zone 1. SFRA: No Risk identified.
Land quality and value	High.
Visual quality	High.
Heritage constraints	Round barrow, earthworks and Civil War history nearby.
Accessibility constraints	Remote from footway network.
Utilities constraints	At extremity of village drainage system.
Comments	Site has heritage constraints, setting of Listed Buildings and the Church. Landscape here considered to be of higher quality, part of the patchwork of historic field patterns to the north of the village.
Conclusion	Not to be allocated. Development here would conflict with Policy NP6.

Site Ref	S3
Site Address	Land rear of Sherington School, School Lane
Location Type	Greenfield.
Flood risk designation	Environment Agency mapping: Flood Zone 1. SFRA: No Risk identified.
Land quality and value	Low
Visual quality	Low
Heritage constraints	No known features. Would require further investigation to be conclusive.
Accessibility constraints	No direct road access.
Utilities constraints	No issues identified.
Comments	Well-contained site in landscape terms close to the facilities within the village. Large number of existing residents surrounding the site. Development not being pursued by landowner at this stage.
Conclusion	Not to be allocated.

Site Ref	S4
Site Address	Land east of School Lane / Crofts End
Location Type	Brownfield.
Flood risk designation	Environment Agency mapping: Flood Zone 1. SFRA: No Risk identified.
Land quality and value	Low
Visual quality	Low
Heritage constraints	No known features. Would require further investigation to be conclusive.
Accessibility constraints	Remote from footway network.
Utilities constraints	No issues identified.
Comments	Site is partly owned by the Diocese of Oxford and Milton Keynes Council. Diocese not pursuing redevelopment option.
Conclusion	Not to be allocated.

Site Ref	S5
Site Address	Land north of Perry Lane
Location Type	Greenfield.
Flood risk designation	Environment Agency mapping: Flood Zone 1. SFRA: No Risk identified.
Land quality and value	Low.
Visual quality	Medium.
Heritage constraints	No known features. Would require further investigation to be conclusive.
Accessibility constraints	Extension to Perry Lane carriageway and footway required.
Utilities constraints	At head of village drainage system.
Comments	Site could be developed with limited impact on other residents. Relatively prominent site on rising ground, although not particularly high visual quality. Would extend the village envelope towards the bypass. Development not being pursued by landowner at this stage.
Conclusion	Not to be allocated.

Site Ref	S6
Site Address	Land east of Bedford Road
Location Type	Greenfield.
Flood risk designation	Environment Agency mapping: Flood Zone 1. SFRA: South west corner of the site potentially at risk from surface water flooding.
Land quality and value	Medium.
Visual quality	Low.
Heritage constraints	No known features. Would require further investigation to be conclusive.
Accessibility constraints	Remote from footway network and services in the village. Significant highway access issues.
Utilities constraints	At extremity of village drainage system. Site levels are such that pumping may be required to reach existing drains.
Comments	The site could include a small development between existing housing and the garden centre along the Bedford Road. Careful consideration would need to be given to screening and landscaping to reduce the potential visual impact on existing residents. Traffic issues and access would need to be resolved.
Conclusion	Not to be allocated.

Site Ref	S7
Site Address	Land south of Crofts End
Location Type	Greenfield
Flood risk designation	Environment Agency mapping: Flood Zone 1. SFRA: No Risk identified.
Land quality and value	High.
Visual quality	High.
Heritage constraints	Site includes a round barrow, evidence of ridge and furrow field patterns.
Accessibility constraints	Remote from footway network.
Utilities constraints	At extremity of village drainage system.
Comments	Development here would have impact upon heritage assets and land of higher value in visual terms. The site is not considered to be suitable for development.
Conclusion	Not to be allocated. Development here would conflict with Policy NP6.

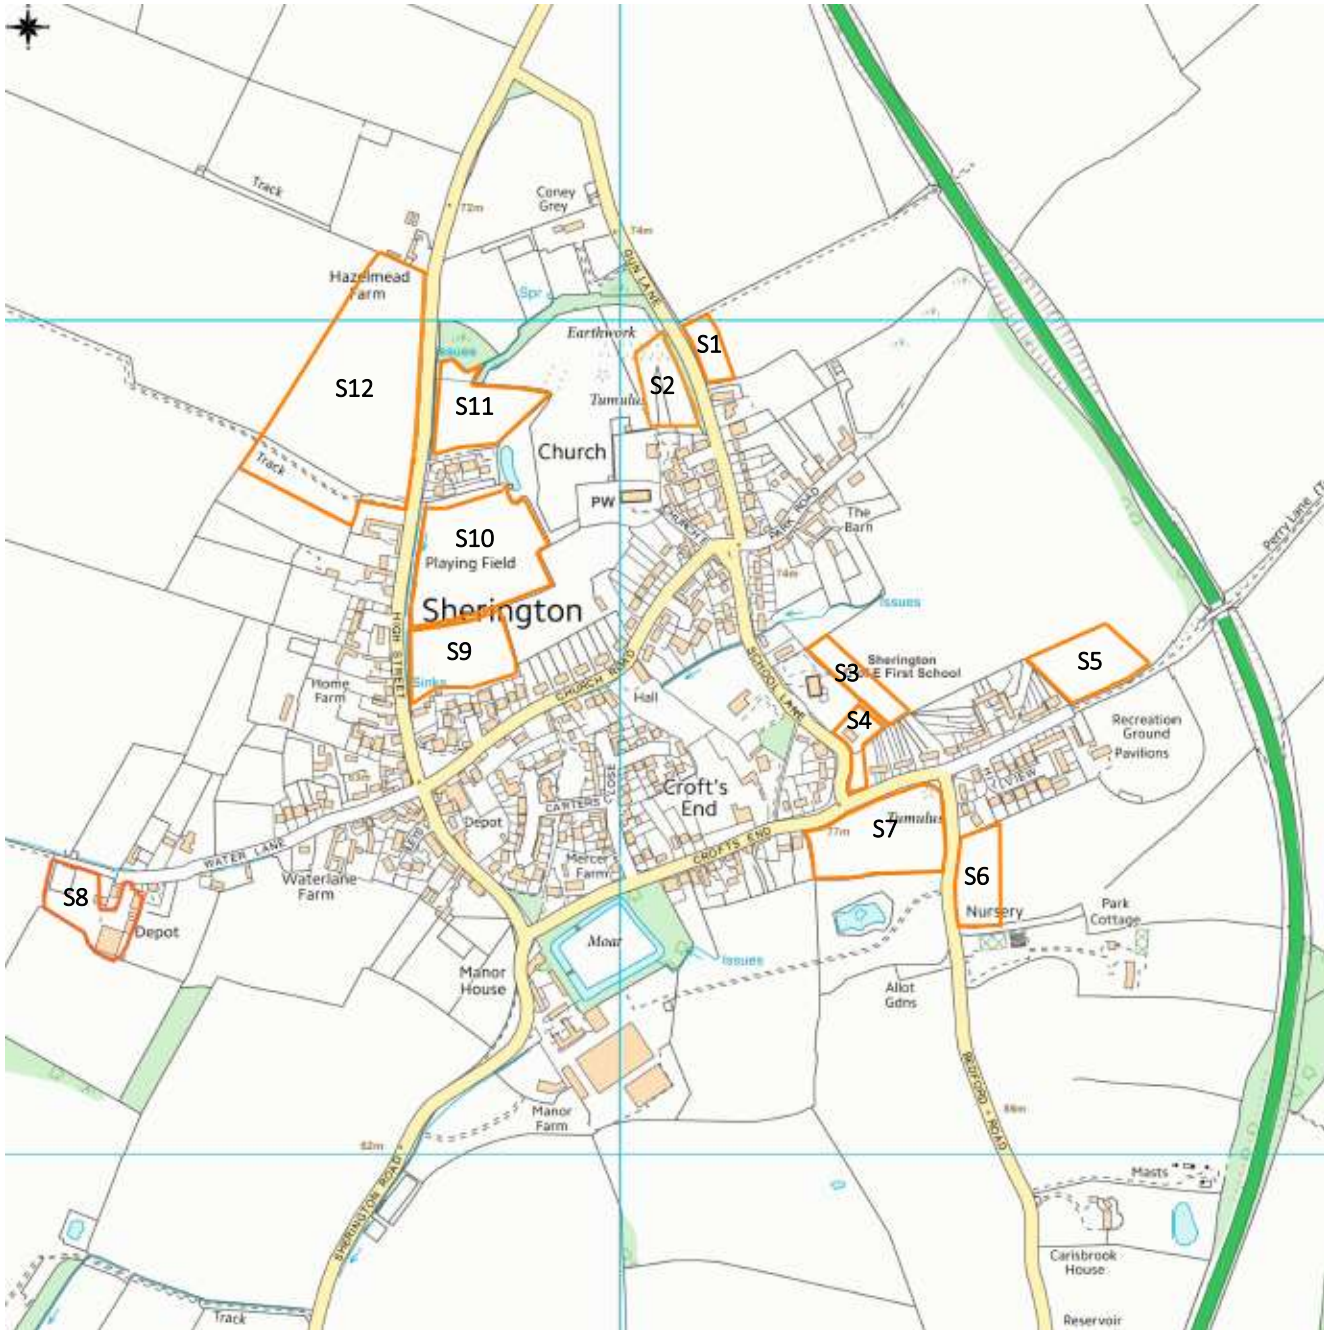

Site Ref	S8
Site Address	Land south of Water Lane
Location Type	Brownfield
Flood risk designation	Environment Agency mapping: Flood Zone 1. SFRA: Site is identified as being at risk from surface water flooding. It is understood that Anglian Water have undertaken works to clear tree routes from the drains in the area, which has resolved the surface water flooding issue. Local observations have confirmed that there have been no further flooding incidents at the site even during storm events. Residual risk could be dealt with through mitigation measures associated with the development. Despite the identified flood risk, other environmental factors and the brownfield nature of the site place this site above other greenfield alternative sites.
Land quality and value	Low.
Visual quality	Low.
Heritage constraints	No known features. Would require further investigation to be conclusive.
Accessibility constraints	Accessibility along Water Lane should be improved for pedestrians.
Utilities constraints	At extremity of village drainage system.
Comments	Brownfield site will be put on the Milton Keynes Council register and given preference for development. Anticipated that consent for development would be forthcoming on this site, regardless of 5-year land supply issue. Opportunities to tidy up the site and make better use of the land available, whilst securing benefits for the village. Redevelopment would allow flood risk issues to be resolved and mitigation measures introduced that offer betterment to the wider area.
Conclusion	Allocate site and ensure that benefits can be secured for the village. See Policy NP8.

Site Ref	S9
Site Address	Land east of High Street, north of Knoll Close
Location Type	Greenfield
Flood risk designation	Environment Agency mapping: Flood Zone 1. SFRA: Surface water flooding identified along High Street.
Land quality and value	High.
Visual quality	High.
Heritage constraints	Impact of development on the setting of the Church and historic setting of the village.
Accessibility constraints	Well used public footpath crosses the site and the other parts of the site have historically been used for walking and recreation by village residents.
Utilities constraints	Surface water drainage issues identified along High Street.
Comments	Development here would fundamentally conflict with the concept of preserving the historical form of Sherington. Remote from other development on this side of High Street. A generous offer has been made to gift land to the village for recreational space. However, development here would fundamentally conflict with the concept of preserving the Local Green Space and the historic fabric of the village.
Conclusion	Not to be allocated. Development here would directly conflict with Policy NP2.

Site Ref	S10
Site Address	Bury Field, east of High Street
Location Type	Greenfield
Flood risk designation	Environment Agency mapping: Flood Zone 1. SFRA: Surface water flooding identified along High Street.
Land quality and value	High.
Visual quality	High.
Heritage constraints	Impact of development on the setting of the Church and historic setting of the village.
Accessibility constraints	Remote from footway network.
Utilities constraints	Surface water drainage issues identified along High Street.
Comments	Site is remote from the village. Development here would impact upon the historic setting of the village. Development would have an urbanising effect on the attractive rural setting of the northern end of the village.
Conclusion	Not to be allocated.

Site Ref	S11
Site Address	Land east of High Street
Location Type	Greenfield
Flood risk designation	Environment Agency mapping: Flood Zone 1. SFRA: Surface water flooding identified along High Street and across the site.
Land quality and value	High.
Visual quality	High.
Heritage constraints	Impact of development on the setting of the Church and historic setting of the village.
Accessibility constraints	Remote from footway network.
Utilities constraints	Surface water drainage issues identified along High Street.
Comments	Site is remote from the village. Development here would impact upon the historic setting of the village. Development would have an urbanising effect on the attractive rural setting of the northern end of the village.
Conclusion	Not to be allocated.

Site Ref	S12
Site Address	Land west of High Street
Location Type	Greenfield.
Flood risk designation	Environment Agency mapping: Flood Zone 1. SFRA: Surface water flooding identified along High Street.
Land quality and value	Low.
Visual quality	Medium.
Heritage constraints	Considered as part of the planning application and appeal.
Accessibility constraints	Remote from footway network.
Utilities constraints	At extremity of village drainage system.
Comments	Appeal on this site allowed for 36 dwellings in outline. Reserved matters to be submitted to define the detailed layout, dwelling mix and materials. A unilateral offer has been made by the developer to contribute up to £100k towards the development of the village shop.
Conclusion	Allocate site and ensure that benefits can be secured for the village. See Policy NP7.

Consideration of Potential Housing Site Allocations

KEY:

 Sites considered

Annex B: Scheduled Monuments and Listed Buildings

These buildings are listed under the Planning (Listed Buildings and Conservation Areas) Act 1990 as amended for their special architectural or historic interest:

Grade	List No.	Location	Number	Name
2	1115834	High Street		K6 Telephone Kiosk
2	1115869	High Street	1	The Lodge
2	1115870	High Street	43	The Old Castle
2	1115871	High Street	47 & 49	
2	1115872	Village Close		Barn to West of Home Farmhouse
2	1115873	High Street	4	The Manor House
2	1115874	High Street		The Small House
2	1115875	The Knoll	2 & 3	
2	1115876	Park Road	18	Roadside
2	1115877	School Lane	2	
2	1115878	Water Lane		Water Lane Farmhouse
2	1115905	Church End		St Laud's, Lychgate to South East Corner of Churchyard
2	1115906	Church End	1 & 3	May Cottage
2	1115907	Gun Lane		Sherington Place
2	1115908	Church Road	24	
2	1115909	Crofts End	23	The Laurels
2	1115910	Crofts End	22 & 24	
1	1212353	Church End,		St Laud's Church
2	1212406	Church Road	8	Arbour House
2	1212408	Crofts End	1	Mercers Farmhouse
2	1212421	Gun Lane		White Hart Inn
2	1212459	The Knoll	8	
2	1212466	Park Road		Yew Tree Farm
2	1212485	Park Road	1 & former No. 3	includes former No.3
2	1289471	Water Lane		Water Lane Farm, Barn South East of Water Lane Farmhouse
2	1289549	Crofts End		Sherington Chapel and Attached Cottages either side
2	1289563	Church End		Church Farmhouse
2	1289566	Church End	5	Calgary House
2	1320181	Church End		St Laud's Church, Anonymous Tomb to South West of West Corner of Nave
2	1320182	Church Road	22	Griggs Farm
2	1320201	High Street	53	Home Farmhouse
2	1320202	High Street	59	Church End Farmhouse now known as Bakers Farm
2	1320203	High Street	16	Harriet's End
2	1320204	Leys View	1	
2	1320205	School Lane	16	The Old Rectory
2	1320206	Water Lane	16	Primrose Cottage and 18

These monuments are scheduled under the Ancient Monuments and Archaeological Areas Act 1979 as amended as they appear to the Secretary of State to be of national importance. These entries are a copy. The originals are held by the Department for Culture, Media and Sport:

List entry Number: 1010190 Bowl barrow at junction of Crofts End and Bedford Road, North East corner of field April 2016

List entry Number: 1019138 Moated site known as Calves Manor immediately east of the Manor House, Sherington Manor House April 2016

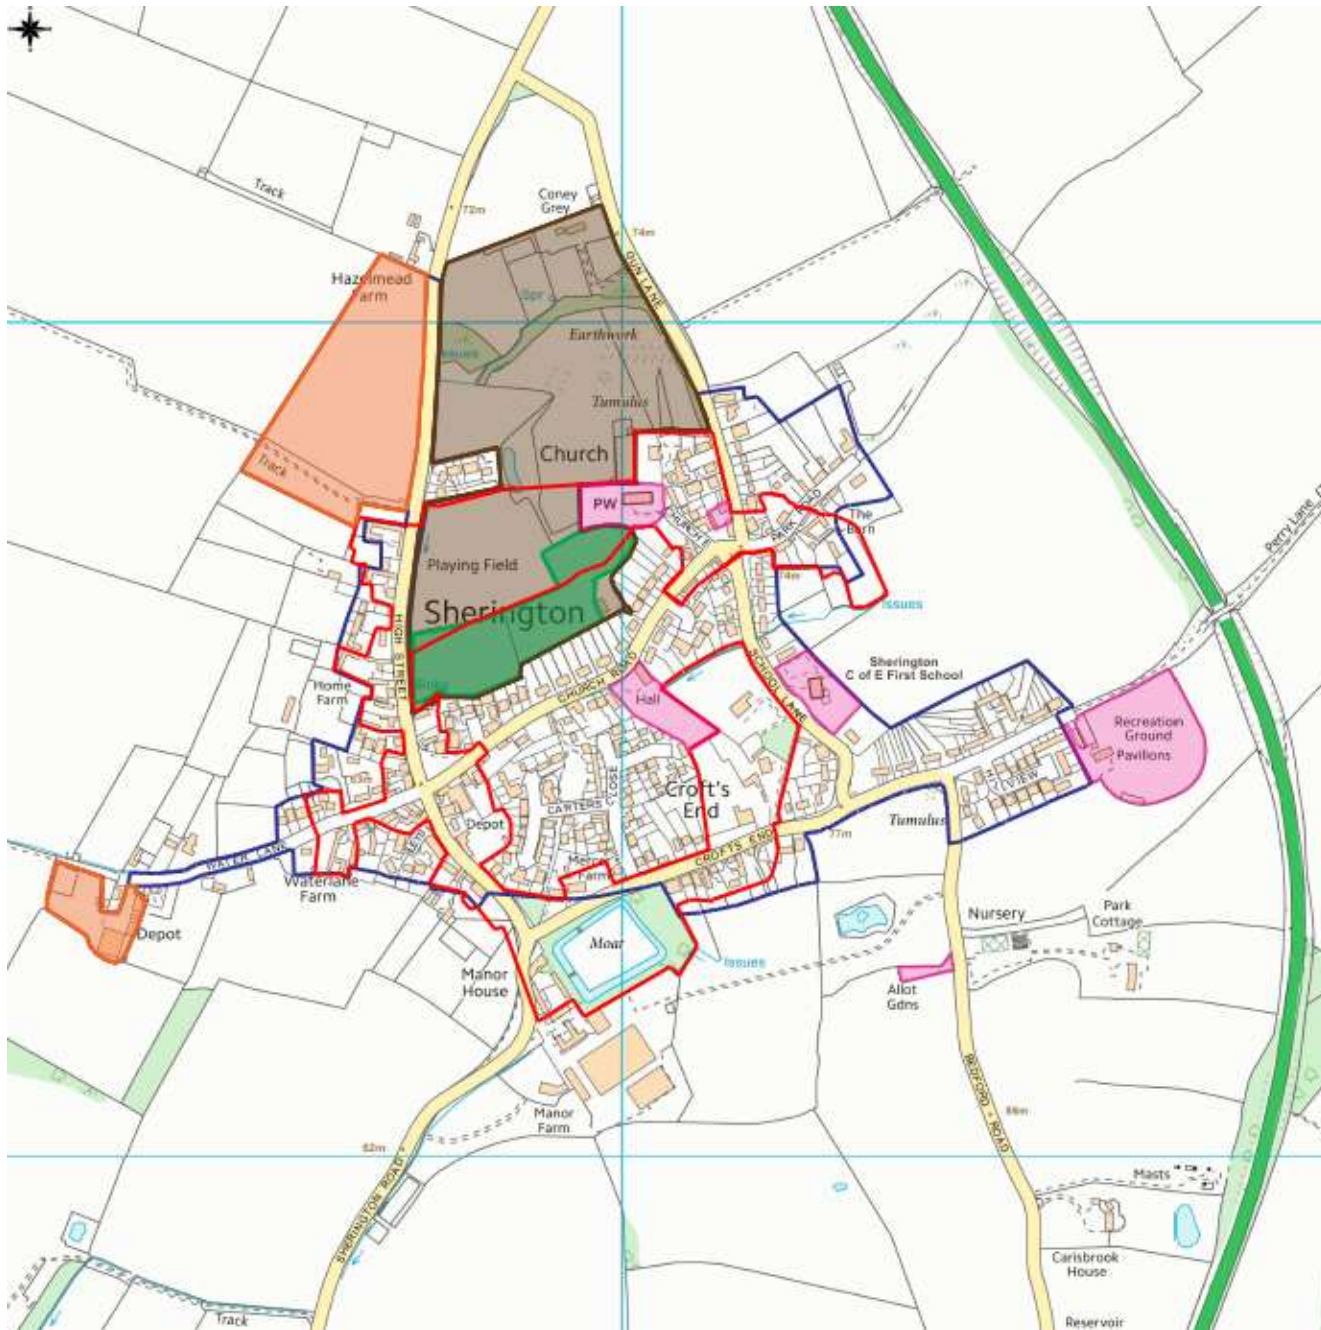

Annex C: Other Buildings of Local Interest

This is a list of other buildings and features, although not listed, were found to be of local interest and worthy of mention in the Neighbourhood Plan.

Location	Number / Name	Comment
Church End	The Brew House	former public house
Church End	No 10	converted barn
Church Road	No 2 and No 2A	cottages
Church Road	No 6	previously the site of the Sherington Saw Mill
