Appendix 2: Protecting Playing Fields Cost Sheets

Football pitches: budget costs for the Protecting Playing Fields Programme

<p>Important Note: Costs shown are typical budget costs to support applications to the Protecting Playing Fields Programme and should not be used for other purposes. The actual cost for any site will only be known after a full site appraisal, the production of a detailed specification, bill of quantities, drawings and receipt of tender bids for the proposed works.</p> <p>* If your pitch size isn't listed opposite, please choose the one closest the size of you pitch.</p> <p>* If you already have a site survey or Feasibility Study with costs for your project then please use them with your application.</p> <p>* Costs are exclusive of VAT</p>	<p>Senior</p> <p>100.58 x 64.01 m with 3.66 m safety margin on all sides.</p>	<p>Youth</p> <p>91.44 x 54.86 m with 3.66 m safety margin on all sides.</p>	<p>Mini- soccer</p> <p>45.72 x 27.43 m with 3.66 m safety margin on all sides.</p>
<p>1. Piped drainage scheme with sand grooves (if required)</p> <p>Typical costs include preliminaries, setting up, transport, installation of pipe drainage scheme, installation of sand grooves, application of fertilizer, seeding and making good^{1,2}.</p> <p style="text-align: right;"><i>Budget cost for piped drainage with sand grooves</i></p>	£38,500	£32,000	£13,500
<p>2. Regrading and improvement of playing surface (if required)</p> <p>Typical costs include preliminaries, setting up, transport, removal of vegetation and goal post sockets, top soil importation, cultivation and grading, sand amelioration, applying fertilizer, seeding and reinstatement³.</p> <p style="text-align: right;"><i>Budget cost for regrading and surface improvement</i></p>	£24,000	£19,800	£8,500
<p>A. Initial maintenance following drainage or improvement works (12 months, provided by the pitch contractor)</p> <p>On completion of improvement works, natural turf pitches are rarely in a condition that would allow them to be playable as the grass will be immature and susceptible to damage. It is therefore recommended that the contractor is responsible for 'growing-in' the pitch and maintaining it for 12 months. Typical costs include mowing, fertilizer and herbicide application, applying and working in topdressing sand, overseeding, compaction alleviation and the treatment of pests and diseases.</p> <p style="text-align: right;"><i>Budget cost for initial maintenance (12 months)</i></p>	£18,000	£14,500	£4,800
<p>B. Annual grounds maintenance costs (assumes all operations are contracted out)</p> <p>It is critical to the long term success of any new pitch works that the pitch is properly maintained.</p> <p>Maintenance work should be carried out by experienced groundsmen and will typically incorporate the following: mowing (say 30 cuts/annum), spreading fertilizer, applying herbicide, applying and working in top dressing sand, reseeding, compaction alleviation, spiking/slitting (x4), application of pesticide/fungicide, weekly line marking and scarification.</p> <p style="text-align: right;"><i>Budget cost for regular ongoing maintenance</i></p>	£12,700	£10,200	£4,500

¹ For situations where the outfall for the drainage water (e.g. a nearby ditch, stream or manhole) is higher than the piped drainage system, there will be a need to install a sump with a pump so that water can be pumped up to the outfall. Pump and sump systems typically add £8,000 to £12,000 to the drainage costs.

2 In certain circumstances, a restriction may be placed on the amount of drainage water that can leave the site in a given time, necessitating the design and installation of some form of attenuation system. These are commonly referred to as sustainable urban drainage systems (SUDS) and typically add £4,000 to £8,000 to the drainage costs.

3 In exceptional circumstances where the slope of the pitch is excessive, it may be necessary to remove the topsoil, reshape the subsoil by removing high areas and building up low areas, replace the topsoil and reseed the site. Depending on how much re-modelling is required, this can add between 20 and 30 % to the re-grading and improvement of playing surface c

Cricket: budget costs for the Protecting Playing Fields Programme

<p>Important Note: Costs shown are typical budget costs to support applications to the Protecting Playing Fields Programme and should not be used for other purposes. The actual cost for any site will only be known after a full site appraisal, the production of a detailed specification, bill of quantities, drawings and receipt of tender bids for the proposed works.</p> <p>* If your pitch size isn't listed opposite, please choose the one closest the size of you pitch. * If you already have a site survey or Feasibility Study with costs for your project then please use them with your application. * Costs are exclusive of VAT</p>	<p>Cricket only</p> <p>8 pitch square: 25.00 x 24.40 m</p> <p>Outfield: 13,542 m².</p>	<p>Cricket + two football pitches on the outfield</p> <p>8 pitch square: 25.00 x 24.40 m</p> <p>Outfield: 21,060 m².</p>
<p>1. Construction works to a cricket square (if required) Typical costs include preliminaries, setting up, transport, excavation, importation and placement of cricket loam, application of fertilizer, seeding, installation of a perimeter drain and irrigation hydrant and making good.</p> <p style="text-align: right;"><i>Budget cost for construction of 8 pitch cricket square</i></p>	£21,000	£21,000
<p>2. Cricket outfield piped drainage scheme with sand grooves (if required) Typical costs include preliminaries, setting up, transport, installation of pipe drainage scheme, installation of sand grooves, application of fertilizer, seeding and making good^{1,2}.</p> <p style="text-align: right;"><i>Budget cost for piped drainage with sand grooves</i></p>	£60,000	£92,000
<p>3. Regrading and improvement of outfield surface (if required) Typical costs include preliminaries, setting up, transport, removal of vegetation, top soil importation, cultivation and grading, sand amelioration, applying fertilizer, seeding and reinstatement³.</p> <p style="text-align: right;"><i>Budget cost for regrading and surface improvement</i></p>	£39,000	£59,000
<p>A. Initial maintenance following construction or improvement works (12 months, provided by the pitch contractor) On completion of improvement works, natural turf facilities are rarely in a condition that would allow them to be playable as the grass will be immature and susceptible to damage. It is therefore recommended that the contractor is responsible for 'growing-in' the facility and maintaining it for 12 months. Typical costs include mowing, fertilizer and herbicide application, rolling, verti-cutting, scarification, spiking, applying and working in topdressing loam, applying and working in topdressing sand, overseeding, compaction alleviation and the treatment of pests and diseases.</p> <p style="text-align: right;"><i>Budget cost for initial maintenance of cricket square(12 months)</i> <i>Budget cost for initial maintenance of outfield(12 months)</i></p>	£9,100 £30,500	£9,100 £46,500
<p>B. Annual grounds maintenance costs (assumes all operations are contracted out) It is critical to the long term success of any new pitch works project that the facility is properly maintained. Maintenance work should be carried out by experienced groundsmen and will typically incorporate the following: mowing, spreading fertilizer, applying herbicide, rolling, verti-cutting, applying and working in top dressing sand, reseeding, compaction alleviation, spiking/slitting, application of pesticide/fungicide and scarification.</p> <p style="text-align: right;"><i>Budget cost for regular ongoing maintenance of cricket square</i> <i>Budget cost for regular ongoing maintenance of outfield</i></p>	£10,500	£10,500

	£18,500	£28,000
--	---------	---------

- 1 For situations where the outfall for the drainage water (e.g. a nearby ditch, stream or manhole) is higher than the piped drainage system, there will be a need to install a sump with a pump so that water can be pumped up to the outfall. Pump and sump systems typically add £12,000 to the drainage costs.
- 2 In certain circumstances, a restriction may be placed on the amount of drainage water that can leave the site in a given time, necessitating the design and installation of some form of attenuation system. These are commonly referred to as sustainable urban drainage systems (SUDS) and typically add £8,000 to the drainage costs.
- 3 In exceptional circumstances where the slope of the outfield is excessive, it may be necessary to remove the topsoil, reshape the subsoil by removing high areas and building up low areas, replace the topsoil and reseed the site. Depending on how much re-modelling is required, this can add between 20 and 30 % to the re-grading and improvement of playing surface cost.

Appendix 5: Planning Policies for Playing Fields

1. Planning policies and potentially an SPD could include the following example wording for the policies to be used to guide playing field provision.

Protection of playing fields

2. There should be a principle that all existing playing field space should be retained.
3. Playing fields in areas where there is an under-provision of pitches in secure community use, now or anticipated in the future, should be protected from development.
4. Where playing fields are agreed by the Council to be lost to development, these should be replaced in a manner which fully meets the requirements of the Core Strategy and National Planning Policy Framework, and the value of any funds raised from development should be reinvested in playing fields to the benefit of community sport.

Amount of playing field space

5. It is proposed that new developments should be required to make provision at a standard rate of hectares per 1000 people, inclusive of space for ancillary requirements such as a clubhouse/changing pavilion, and car parking.

Provision on-site and off-site

6. Provision may be appropriate on-site for large housing developments for football and cricket. However off-site equivalent contributions are otherwise required. Off-site contributions should be appropriate, for increasing the number of facilities and/or aimed at increasing the quality of existing sites in order to improve their carrying capacity, so as to meet the increased demand.

Determining the value of off-site contributions

7. The costs associated with the contributions will be based on the latest Sport England Facility Costs guidance, or more specific local site costs, whichever is the greater.
8. If the Council moves towards a tariff approach for developers' contributions, this methodology should be used to determine the appropriate charge.

Guidelines for quality and accessibility

9. Sports should be provided for on separate sites, as they have over-lapping seasons and different needs.

10. New pitches should be provided in appropriate locations, which will include accessibility, secure access, appropriate site levels, orientation, surrounding land uses, subsoil, etc.
11. The 'community use' sites should not be considered "multi-purpose" i.e.:
 - Should not be considered as also being informal recreation sites, i.e. should not be part of a park;
 - Should not generally be shared with school use;
 - The sites should be designed to discourage significant informal use, including any desire lines/paths crossing the sites and pitches in particular. This will often include a need for fencing;
 - All sites should be provided with changing accommodation or clubhouses suitable for the sport and the number of pitches on site, in order to meet Sport England or national governing body guidance;
 - Clubhouse/changing pavilions should be designed and developed according to Sport England guidance, or that of the national governing body;
 - Pitches should not be located within a floodplain which is estimated to have a flood risk of 1% or greater (1 in 100 years), as identified on the Environment Agency flood maps.
12. Community playing fields will generally be developed separately from school pitches. However if dual use is considered, the following principles should be applied:
 - The number of pitches which should be provided on- site should be significantly greater than the number of pitches required for the educational use alone (so as to avoid overuse);
 - If provided for winter sports (rugby union, football) there should be no or very limited use of the grass area during the summer months;
 - The pitches should be developed to meet the technical guidance of Sport England or the national governing body for the sport;
 - The pitches should be supported by appropriate fully accessible changing facilities;
 - The site should have appropriate security arrangements and layouts to enable community use;

- The pitches to be used by the community should be subject to a legally binding Joint Use Agreement of not less than 20 years; which sets out a minimum level of use per week during the season;
- The pitches should be maintained with an intensive regime to ensure maintenance of standards of play, and the intention to do so should be included within the community use agreement.

Appendix 6: Football Clubs and Teams
