

Plastic milk bottle elephant

Make this elephant so you never forget to recycle plastic bottles!

You will need:

- Empty plastic milk bottle
- Pair of scissors
- 2 split pins
- Pencil
- Glue stick
- Felt tip pens
- Googly eyes, stickers, scraps of cloth, tissue paper, etc

1. Wash out well an empty plastic milk bottle.

2. Use a pair of scissors to carefully cut through the bottom of the handle and then continue across, cutting around the main body of the bottle at the same level.

3. On one side cut out an arch shape. Repeat on the other side. Keep the cut-out pieces to use later as ears.

4. Cut out an arch shape under the handle to create the trunk.

5. At the rear cut out a 'M' shape to create a tail.

6. Now use the left-over cut-out pieces to make the ears. Push a split pin through the ear piece and then the main body. Open up split pin. Repeat on both sides.

7. Add the lid for hat, googly eyes, stickers, scraps of fabric, feathers, sequins, tissue paper, glitter, etc and enjoy decorating your elephant!
