**Subject:** FW: Planning application response-19/01818/OUT- Land At Brickhill Street South

Caldecotte Milton Keynes MK17 9FE

**Attachments:** PLN-0065504 - Planning Report.pdf

Dear Sir/Madam

Our Reference: PLN-0065504

Please find attached our response for the planning application- 19/01818/OUT- Land At Brickhill Street South Caldecotte Milton Keynes MK17 9FE.

Please do not hesitate to contact the Pre-Development Team on the number below or via email should you have any questions related to our planning application response.

Kind regards,

Kimberley

Site: Land At Brickhill Street South Caldecotte

Milton Keynes MK17 9FE

Proposal: Outline application including access for the

development of the site for employment uses, comprising of warehousing and distribution (Use Class B8) floorspace (including mezzanine floors) with ancillary B1a office space, general industrial (Use

Class

Planning 19/01818/OUT

application:

Prepared by: Pre-Development Team

**Date: 28 August 2019** 

#### **ASSETS**

#### **Section 1 - Assets Affected**

There are assets owned by Anglian Water or those subject to an adoption agreement within or close to the development boundary that may affect the layout of the site. Anglian Water would ask that the following text be included within your Notice should permission be granted.

Anglian Water has assets close to or crossing this site or there are assets subject to an adoption agreement. Therefore the site layout should take this into account and accommodate those assets within either prospectively adoptable highways or public open space. If this is not practicable then the sewers will need to be diverted at the developers cost under Section 185 of the Water Industry Act 1991. or, in the case of apparatus under an adoption agreement, liaise with the owners of the apparatus. It should be noted that the diversion works should normally be completed before development can commence.

#### **WASTEWATER SERVICES**

#### **Section 2 - Wastewater Treatment**

The foul drainage from this development is in the catchment of Cotton Valley Water Recycling Centre which currently does not have capacity to treat the flows the development site. Anglian Water are obligated to accept the foul flows from the development with the benefit of planning consent and would therefore take the necessary steps to ensure that there is sufficient treatment capacity should the Planning Authority grant planning permission.

#### Section 3 - Used Water Network

Development will lead to an unacceptable risk of flooding downstream. Anglian Water will need to plan effectively for the proposed development, if permission is granted. We will need to work with the applicant to ensure any infrastructure improvements are delivered in line with the development. (1) INFORMATIVE - Notification of intention to connect to the public sewer under S106 of the Water Industry Act Approval and consent will be required by Anglian Water, under the Water Industry Act 1991. Contact Development Services Team 0345 606 6087. (2) INFORMATIVE - Notification of intention to connect to the public sewer under S106 of the Water Industry Act Approval and consent will be required by Anglian Water, under the Water Industry Act 1991. Contact Development Services Team 0345 606 6087. (3) INFORMATIVE - Protection of existing assets - A public sewer is shown on record plans within the land identified for the proposed development. It appears that development proposals will affect existing public sewers. It is recommended that the applicant contacts Anglian Water Development Services Team for further advice on this matter. Building over existing public sewers will not be permitted (without agreement) from Anglian Water. (4) INFORMATIVE - Building near to a public sewer - No building will be permitted within the statutory easement width of 3 metres from the pipeline without agreement from Anglian Water. Please contact Development Services Team on 0345 606 6087. (5) INFORMATIVE: The developer should note that the site drainage details submitted have not been approved for the purposes of adoption. If the developer wishes to have the sewers included in a sewer adoption agreement with Anglian Water (under Sections 104 of the Water Industry Act 1991), they should contact our Development Services Team on 0345 606 6087 at the earliest opportunity. Sewers intended for adoption should be designed and constructed in accordance with Sewers for Adoption guide for developers, as supplemented by Anglian Water's requirements.

# **Section 4 - Surface Water Disposal**

The preferred method of surface water disposal would be to a sustainable drainage system (SuDS) with connection to sewer seen as the last option. Building Regulations (part H) on Drainage and Waste Disposal for England includes a surface water drainage hierarchy, with infiltration on site as the preferred disposal option, followed by discharge to watercourse and then connection to a sewer.

From the details submitted to support the planning application the proposed method of surface water management does not relate to Anglian Water operated assets. As such, we are unable to provide comments on the suitability of the surface water management. The Local Planning Authority should seek the advice of the Lead Local Flood Authority or the Internal Drainage Board. The Environment Agency should be consulted if the drainage system directly or indirectly involves the discharge of water into a watercourse. Should the proposed method of surface water management change to include interaction with Anglian Water operated assets, we would wish to be reconsulted to ensure that an effective surface water drainage strategy is prepared and implemented.

# **Section 5 - Suggested Planning Conditions**

Anglian Water would therefore recommend the following planning condition if the Local Planning Authority is mindful to grant planning approval.

# **Used Water Sewerage Network (Section 3)**

CONDITION No drainage works shall commence until a foul water management strategy has been submitted to and approved in writing by the Local Planning Authority. No hard-standing areas to be constructed until the works have been carried out in accordance with the surface water strategy so approved unless otherwise agreed in writing by the Local Planning Authority. REASON To prevent environmental and amenity problems arising from flooding. We therefore highly recommend that you engage with Anglian Water at your earliest convenience in order to obtain a connection point, discharge rate and to ensure the required infrastructure will be in place in time for development completion. If you have not done so already, we recommend that you submit a Pre-planning enquiry with our Pre-Development Team. This can be completed online at our website http://www.anglianwater.co.uk/developers/pre-development.aspx If a foul or surface water condition is applied by the Local Planning Authority to the Decision Notice, we will require a copy of the following information prior to recommending discharging the condition:

# FOR THE ATTENTION OF THE APPLICANT - if Section 3 or Section 4 condition has been recommended above, please see below information:

## Next steps

Desktop analysis has suggested that the proposed development will lead to an unacceptable risk of flooding downstream. We therefore highly recommend that you engage with Anglian Water at your earliest convenience to develop in consultation with us a feasible drainage strategy.

If you have not done so already, we recommend that you submit a Pre-planning enquiry with our Pre-Development team. This can be completed online at our website <a href="http://www.anglianwater.co.uk/developers/pre-development.aspx">http://www.anglianwater.co.uk/developers/pre-development.aspx</a>

Once submitted, we will work with you in developing a feasible mitigation solution.

If a foul or surface water condition is applied by the Local Planning Authority to the Decision Notice, we will require a copy of the following information prior to recommending discharging the condition:

#### Foul water:

- Feasible drainage strategy agreed with Anglian Water detailing the discharge solution including:
  - · Development size
  - Proposed discharge rate (Should you require a pumped connection, please note that our minimum pumped discharge rate is 3.8l/s)
  - Connecting manhole discharge location (No connections can be made into a public rising main)
- Notification of intention to connect to the public sewer under S106 of the Water Industry Act (More information can be found on our website)
- · Feasible mitigation strategy in agreement with Anglian Water (if required)

#### Surface water:

- Feasible drainage strategy agreed with Anglian Water detailing the discharge solution, including:
  - · Development hectare size
  - Proposed discharge rate (Our minimum discharge rate is 5l/s. The applicant can verify the site's existing 1 in 1 year greenfield run off rate on the following HR Wallingford website -http://www.uksuds.com/drainage-calculation-tools/greenfield-runoff-rate-estimation. For Brownfield sites being demolished, the site should be treated as Greenfield. Where this is not practical Anglian Water would assess the roof area of the former development site and subject to capacity, permit the 1 in 1 year calculated rate)
  - Connecting manhole discharge location
- Sufficient evidence to prove that all surface water disposal routes have been explored as detailed in the surface water hierarchy, stipulated in Building Regulations Part H (Our Surface Water Policy can be found on our website)
