

Small Actions bingo game

Learn through play

This game is a fun way to learn how our changing small every day actions can help the environment.

For up to 16 players

Includes:

16 bingo boards

15 caller cards

Before you start:

- Collect qty 9 counters per person – this could be plastic milk bottle lids, counters or cardboard cereal box or paper cut into squares.
- Print off the Bingo Boards and Caller Cards below, single sided, in colour.

Setting Up

- Choose one person to be the Bingo Caller. The Bingo Caller has all of the Caller Cards and Winner Cards.
- Issue a Bingo Board to each of the Players.
- Place all the bottle lids/cardboard squares in the centre of the table. During the game the Players place the lids the over the pictures on their Bingo Boards as the items are called out by the Bingo Caller.

Play Bingo!

1. The Caller selects one of the Caller Cards, holds it up and reads out the description.
2. Each of the Players places a lid over the image of the item called on their Bingo Board.
3. Repeat items 1 and 2 until a Player has 3 lids on their board in a line – either horizontally or vertically or diagonally. Once a Player has 3 lids in a row they call out 'Line!'.
4. The Caller then checks the Players Bingo Board to confirm the row is correctly called.
5. To Win: Play continues until a Player has covered their whole Bingo Board with lids and calls out 'Bingo!'. The Caller then checks the Players Bingo Board to confirm and the winner is given a Winner Card, ending that game. All Players now clear their boards of lids placing them back into the centre of the table.
6. The game can be repeated again and again.
