

Highway repairs and maintenance

We'll be doing works in your area soon, here's what you need to know...

You may need to park your car elsewhere if you need regular access to it, especially if we need to access drains or lamp columns.

Keep to a low speed when approaching the work area and follow the guidance on the signs or from the site operatives.

Access for fire engines, police vehicles and ambulances will be maintained at all times.

Vehicle access to properties will be maintained as much as possible however there may be temporary periods when we must close areas off completely. You'll always be able to access your home.

Highway repairs and maintenance

We'll be doing works in your area soon, here's what you need to know...

Our staff will wear ID and branded PPE. They do not cold call or offer any services for your property. Any individuals claiming to do this should be reported to Trading Standards.

If the dates change we'll let you know what the new ones are using the yellow scheme notice boards. We may have to reschedule if the weather conditions are poor.

Although it's a work site and heavy machinery will be noisy, we'll do our best to keep it to a minimum.

Please reschedule any deliveries to your property during the time the site is in operation if access is restricted.

All roadwork, closures and diversions for MK are listed online at: one.network
