18 December 2025

Dear Resident,

Re: Update on H10 Bletcham Way Extension – Phase 2 (Old Farm Park to Wavendon)

We wanted to share an update on the H10 Bletcham Way Extension Phase 2 Project.

Planning permission for the extension was granted in June 2024, and funding was approved at the Cabinet meeting on 4 November after all technical design work was completed. Our Highways Major Projects and Development Teams are managing the project from design through to construction.

This is a significant, multi-million-pound scheme, so we are using a competitive tender process through the Midlands Highways Alliance (MHA) to ensure the best value.

Project Overview

The project is being delivered in two Phases:

Phase 1 – Temporary Access Road

This was completed in April 2024.

Phase 2 – Main Construction

This will involve building the main eastern extension of H10 Bletcham Way, along with associated works.

Advance Works (January – April 2026)

These will be carried out by our Highways Service Provider, Ringway, and include:

- Site clearance (trees and vegetation) in Byrd Crescent and nearby land
- Diversion of Anglian Water pipes and electrical cables
- Diversion of overhead high-voltage cables and a section of foul water sewer in Gregories Drive (planned around Easter holidays to minimise disruption)

- The footway on the west side of Byrd Crescent will be closed for a short period of time. The Redway will remain open throughout the works. We may need to close Bryd Crescent for a short on safety grounds, access to local properties will be maintained.

Main Works (Starting Summer 2026 – approx. 18 months)

Scope includes:

- Construction of the H10 road extension
- Enlarged roundabout at Britten Grove/Gregories Drive
- New bridge over Byrd Crescent
- Landscaping and tree replacement
- Noise bunds
- New Pegasus crossing
- Two attenuation ponds
- Extension of Redways and footways
- Service diversions
- Temporary car park for residents during road closures

We will maintain local access to all properties and provide safe pedestrian routes throughout. Full project details and drawings can be viewed at www.milton-keynes.gov.uk/highways under 'Major Projects' or by scanning the QR code below.

We have worked hard to minimise disruption, but as with any large-scale project, some inconvenience is unavoidable. Thank you for your patience and understanding—we will keep you updated and share details of road closures and diversions closer to the start date.

Kind Regards

Diljeet Singh
